1. CineVerse and the Scope of This Guide

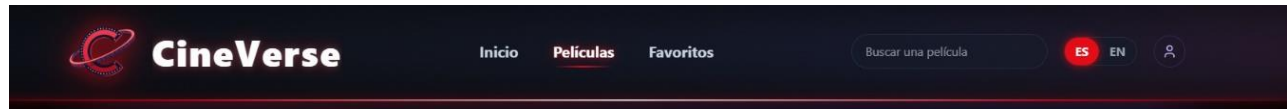

This guide explains what CineVerse looks like and how to use it in a web browser. It focuses on the visible user experience: navigation, movies, actors, filters, favorites, account features, reviews, and password recovery.

CineVerse lets users view information about movies and actors, search for titles, apply filters, save favorites, and, with a verified account, publish reviews. Movie and actor information comes from TMDB; reviews and account data belong to CineVerse.

- You do not need to sign in to explore movies and actors or save favorites in this browser.
- An account is required to write, edit, and delete reviews and to view profile activity.
- The interface can be used in Spanish or English.
- The examples show the actual behavior of the documented version.
- To protect privacy, email addresses and tokens visible in some screenshots are shown using sample values.

2. Header and General Navigation

The header elements remain available at all times.

CineVerse header.

From the menu, users can go to Home, Movies, and Favorites. On the right are the quick search, the ES/EN selector, and account access.

Search, language, and user access.

2.1 Footer

The CineVerse footer appears at the bottom of the site. It displays the site name, the project year and author, and attribution for the data provided by TMDB.

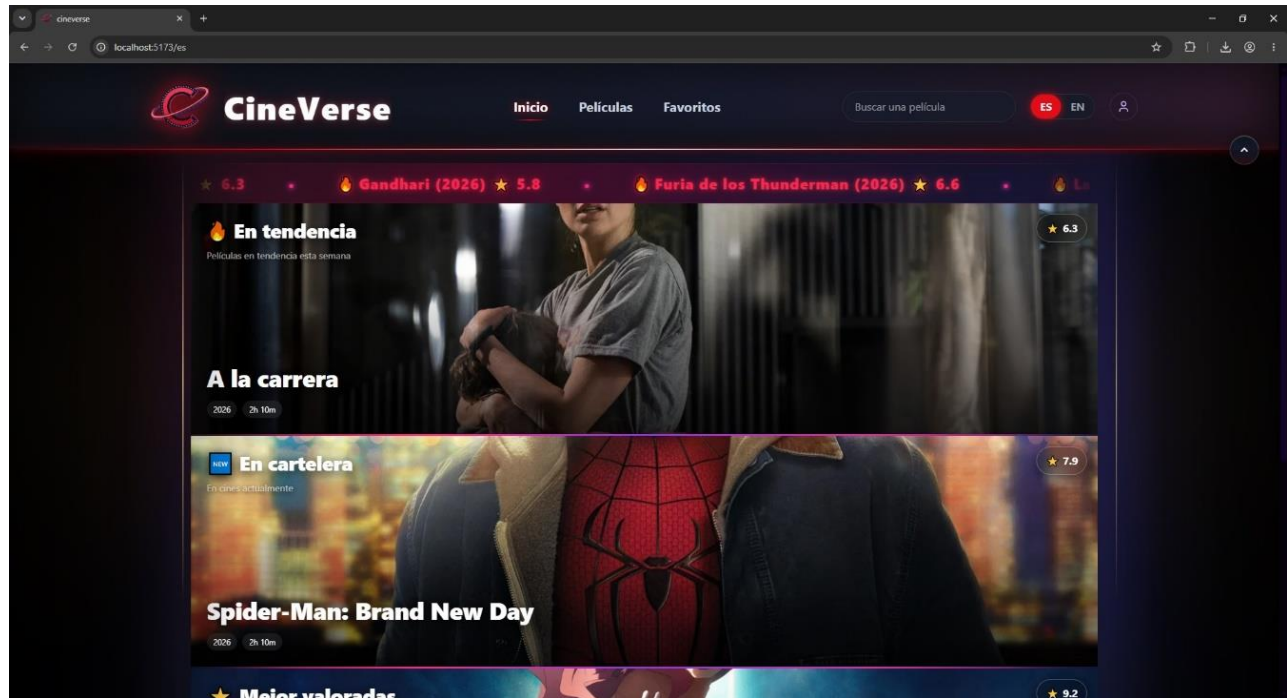

CineVerse footer.

Search for a movie	Switch ES/EN	Sign in / menu
--------------------	--------------	----------------

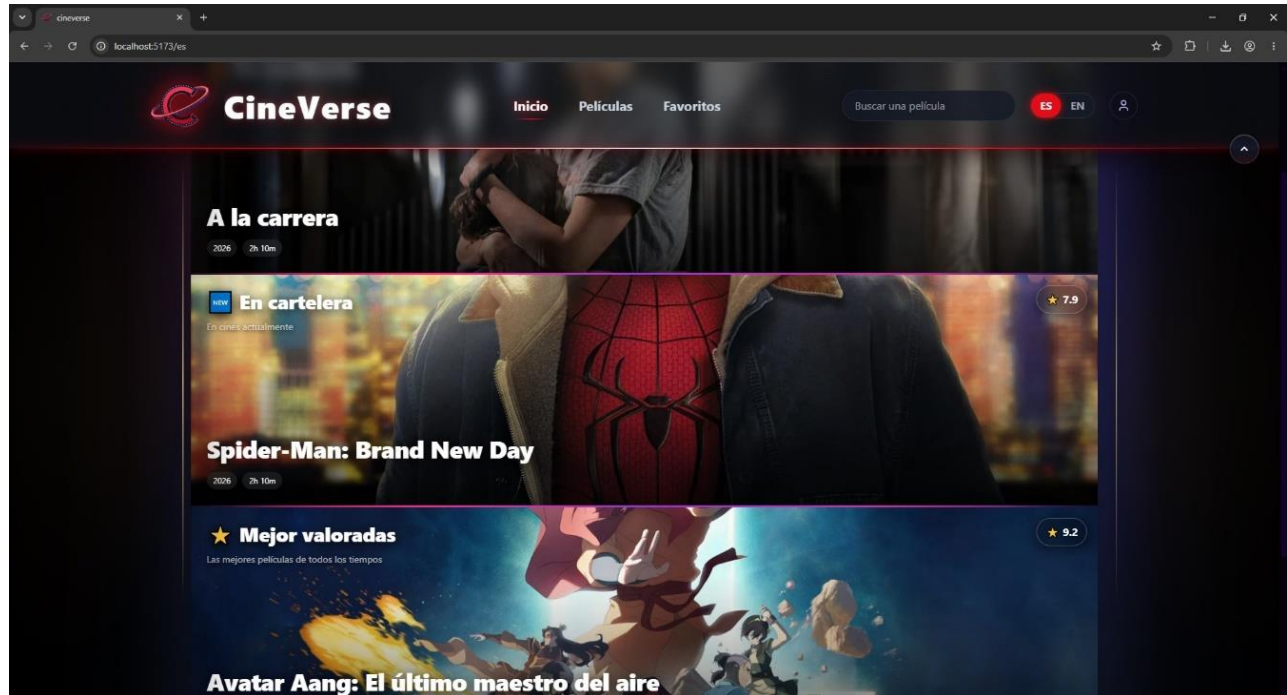

3. Home Page

The home page features three groups of movies: trending titles, movies currently in theaters, and top-rated movies.

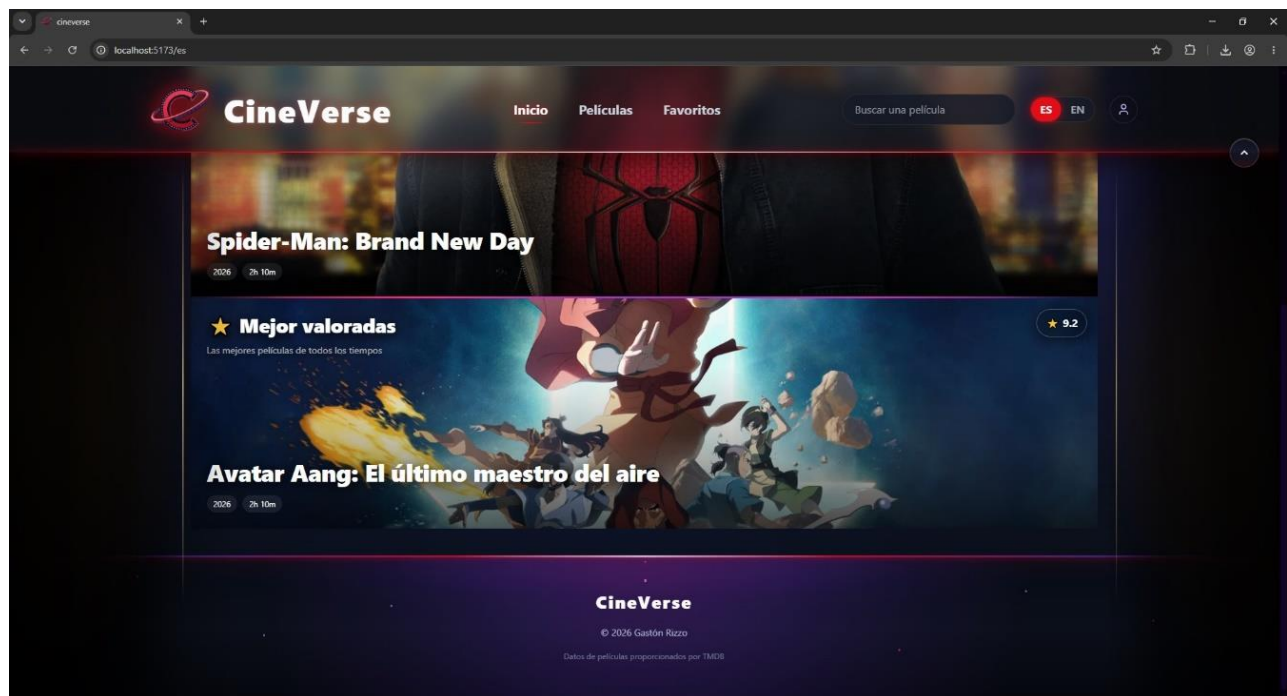

Top of the home page: trending titles and movies in theaters.

The home page continues below

Continuation of the home page with the different rows.

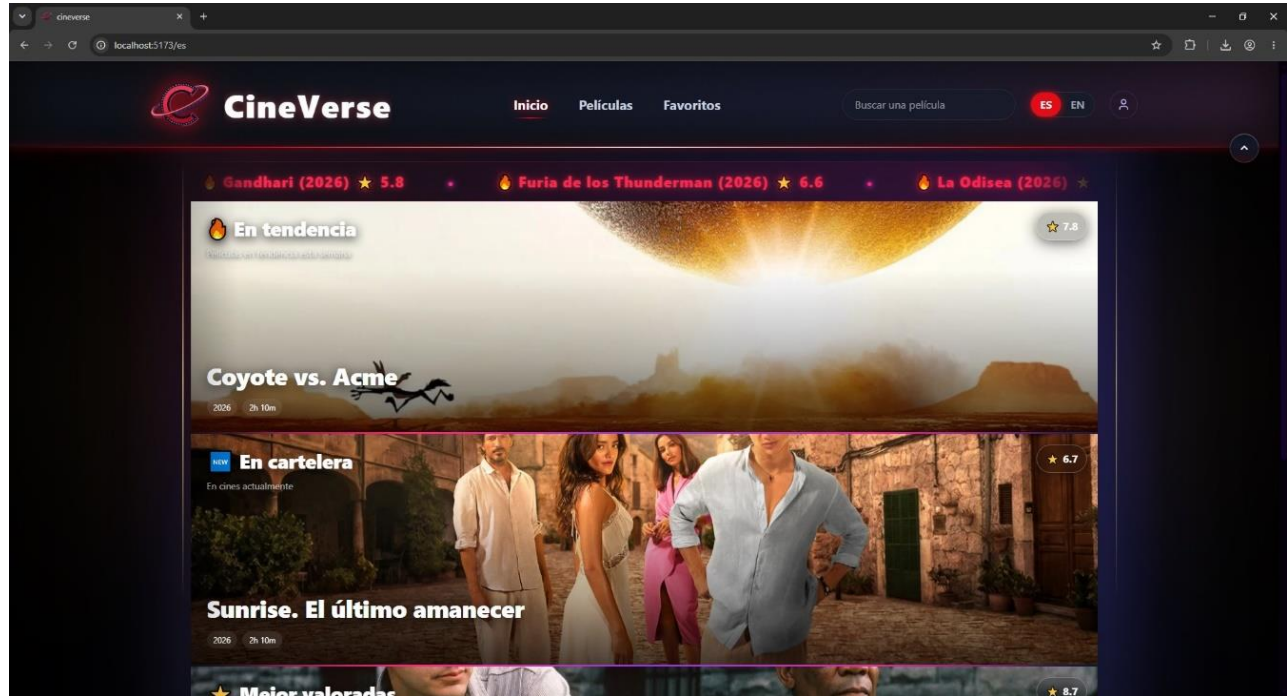

Bottom of the home page and footer.

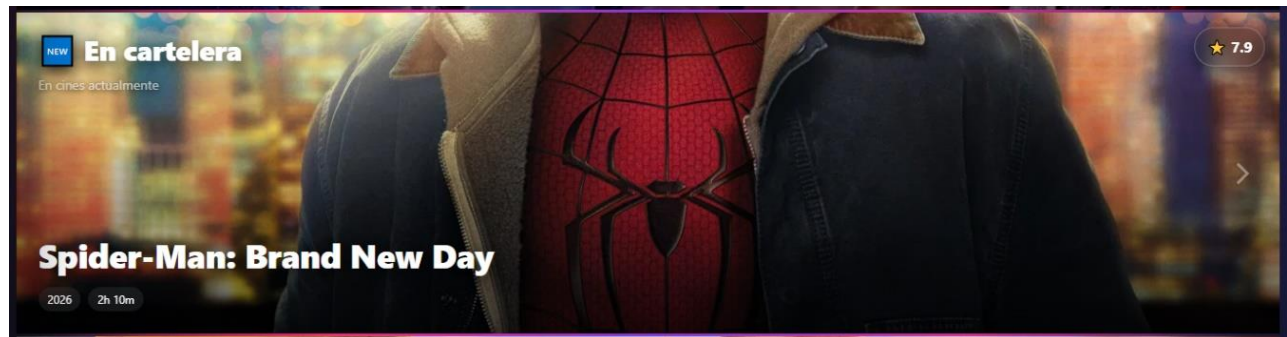

Important Each row loads independently. If one request takes longer, the others may appear first.

4. Home Carousels

The rows on the Home screen display one featured movie at a time and advance automatically. They can also be navigated manually using the side arrows.

Example of another carousel state.

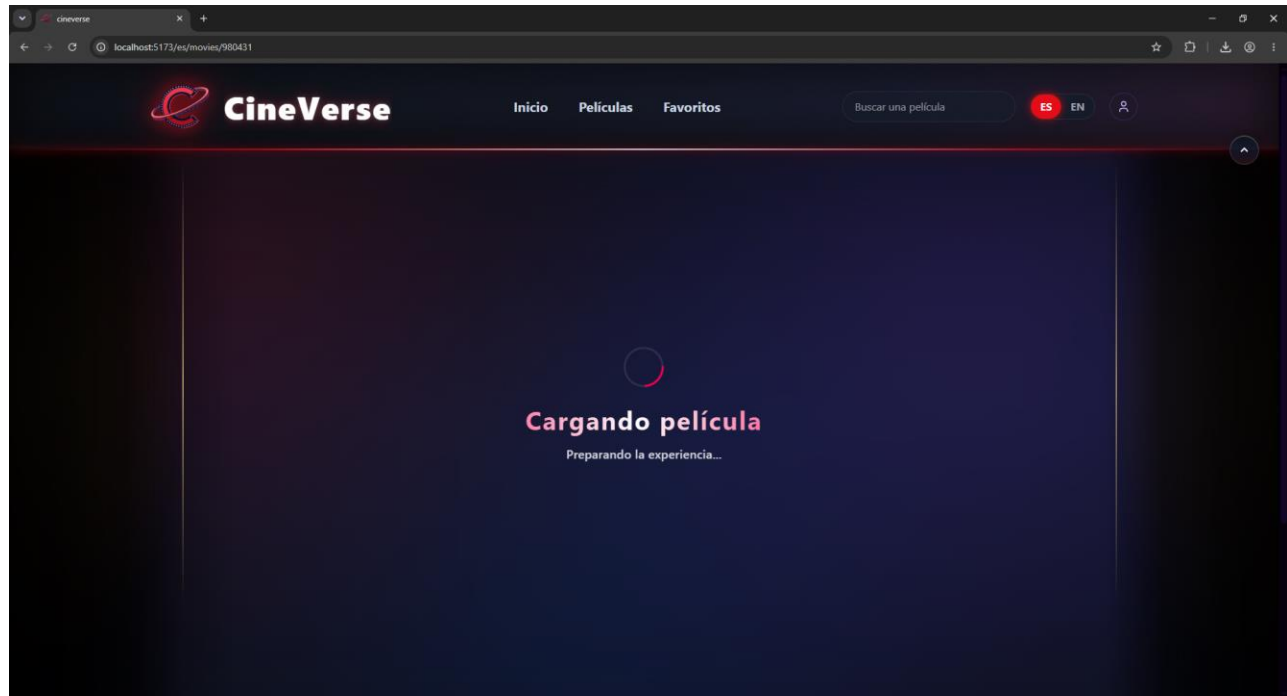

Close-up of a carousel card.

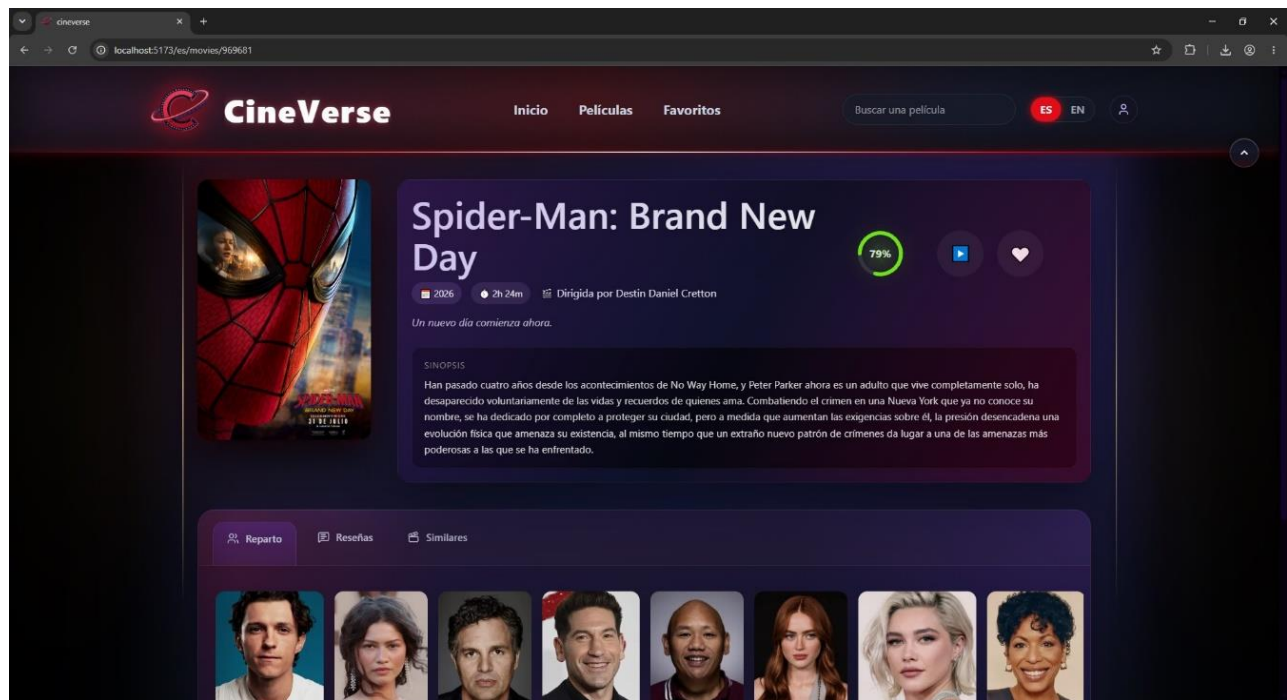

Displayed runtime In the current version, the runtime shown on Home cards is a fixed label. The movie's actual runtime is available on the details page.

5. Movie Details

When a movie is selected, CineVerse first displays a loading state and then shows the complete details.

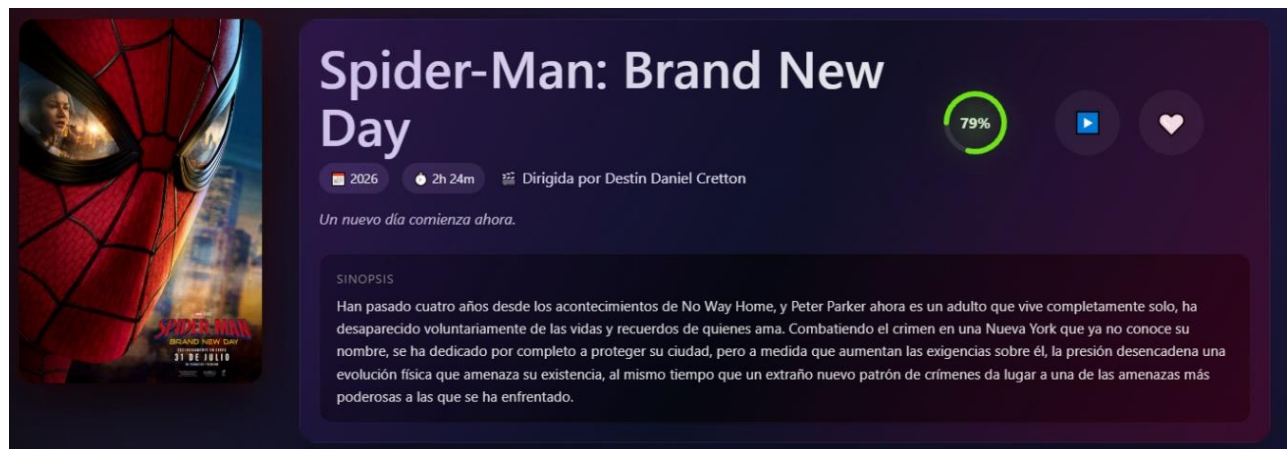

Loading state before the movie is displayed.

Movie details with the main information panel and tabs.

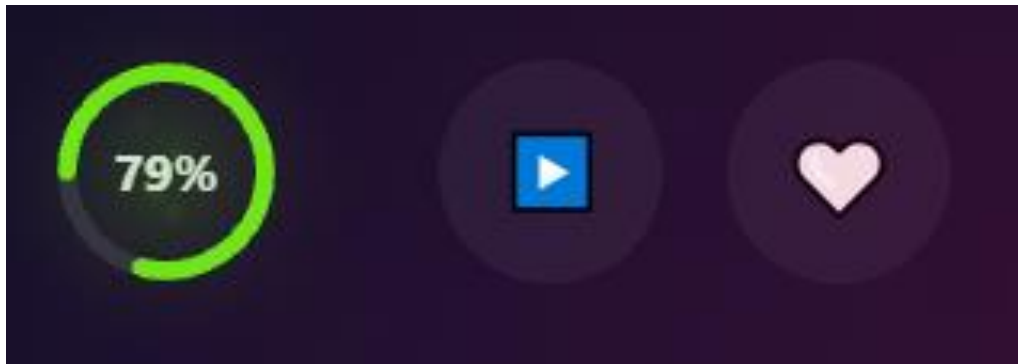

The panel displays the poster, title, year, runtime, director, synopsis, and controls for the rating, trailer, and favorites. Below it are the Cast, Reviews, and Similar tabs.

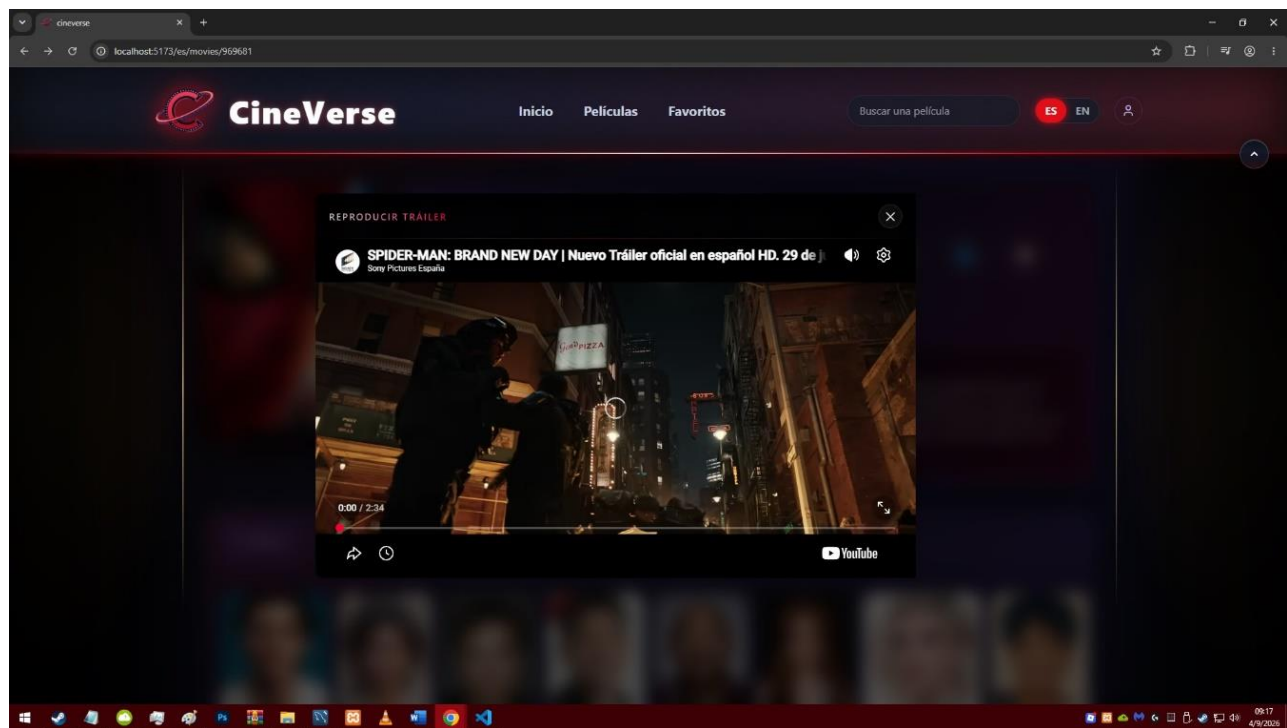

Close-up of the main information panel.

6. Trailer

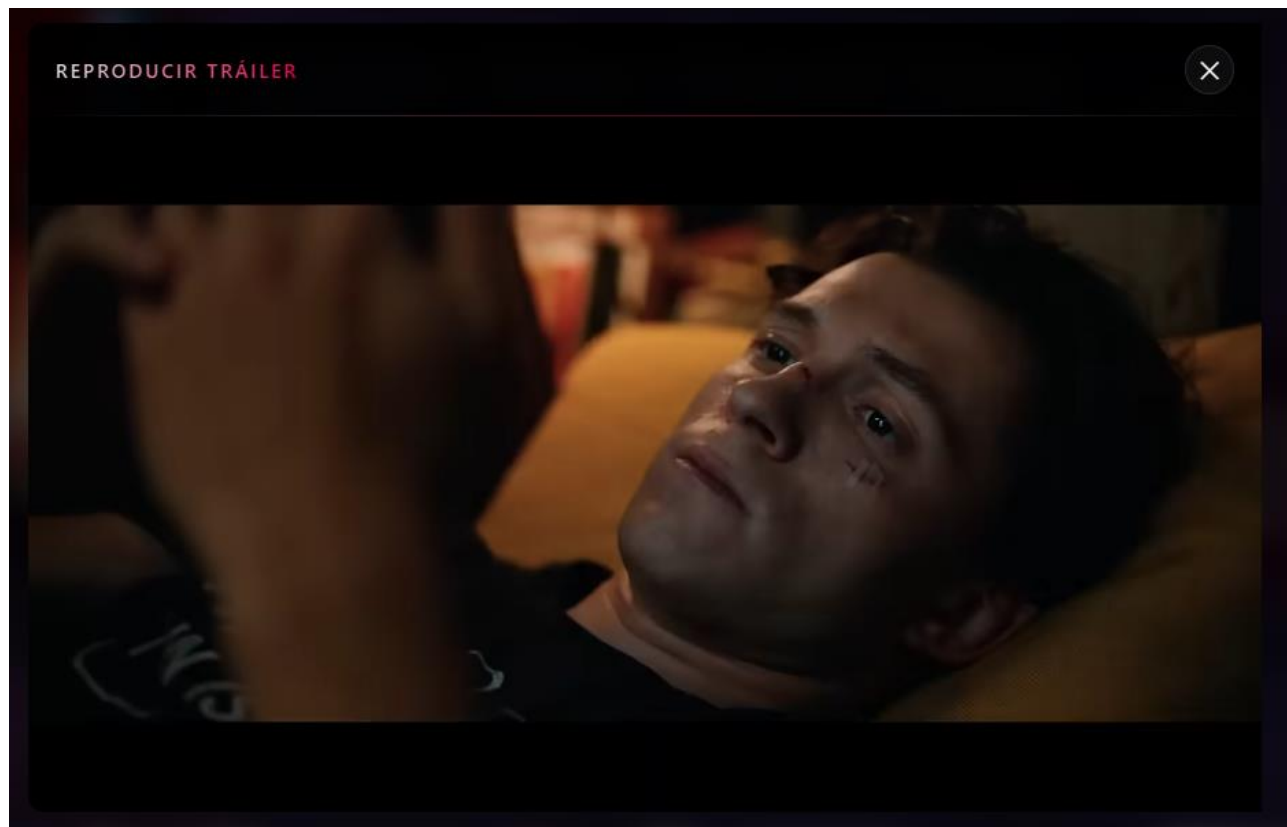

When TMDB provides a YouTube trailer, the blue button opens it in a modal within CineVerse. The user does not need to leave the site.

TMDB rating, trailer, and favorite controls.

Trailer open within the page.

Expanded view of the trailer modal.

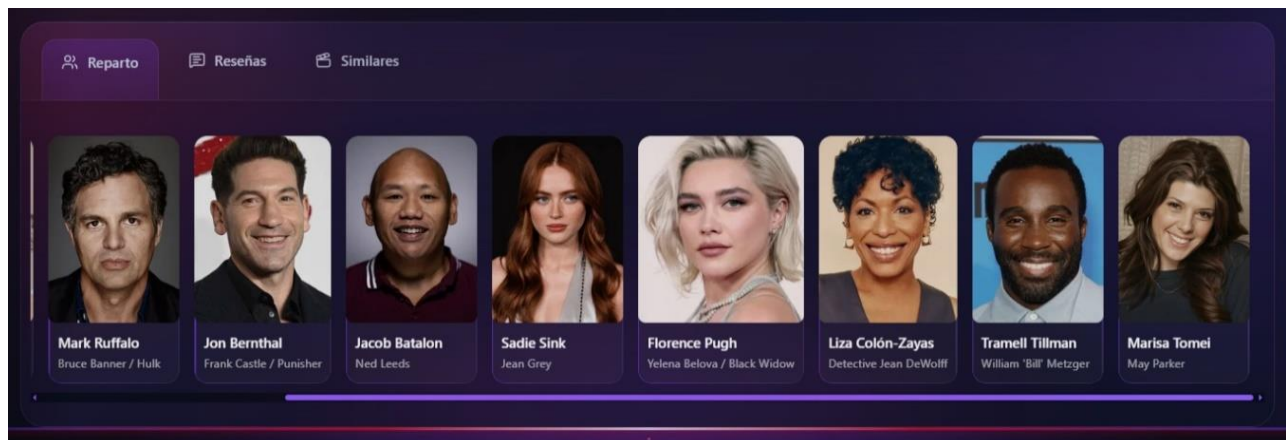

The modal can be closed with the close button. The page content remains behind it and becomes available again when the trailer is closed.

7. Cast

The Cast tab is the default tab in the lower section of the movie details page. It displays up to ten main cast members.

First cast members.

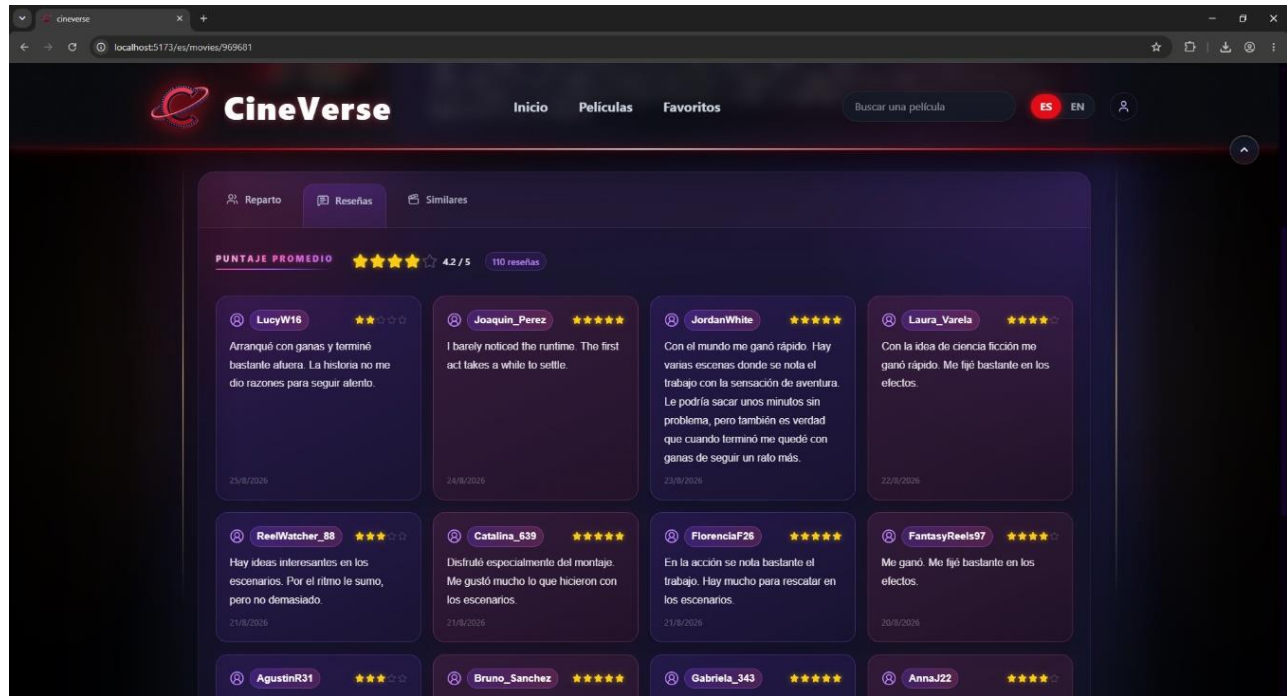

Horizontal continuation of the cast list.

What happens when an actor is selected Clicking a cast card opens the public profile of the selected actor.

8. Reviews

Reviews belong to CineVerse, not TMDb. The tab loads when the user opens it and displays the community average, the total number of reviews, the user's own review if one exists, and reviews from other users.

Reviews tab with the average rating and community review cards.

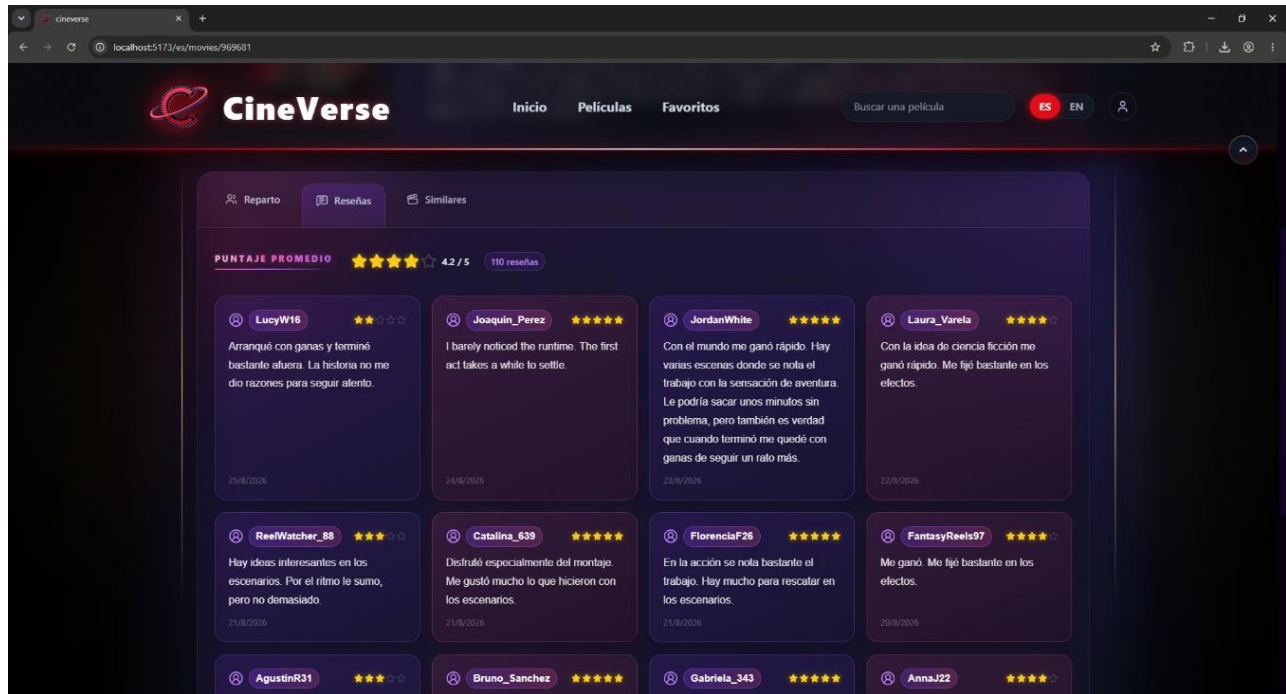

CineVerse average rating and total number of reviews.

Do not confuse the ratings The TMDb rating appears in the movie's main information panel. The average in this section is calculated only from reviews stored in CineVerse.

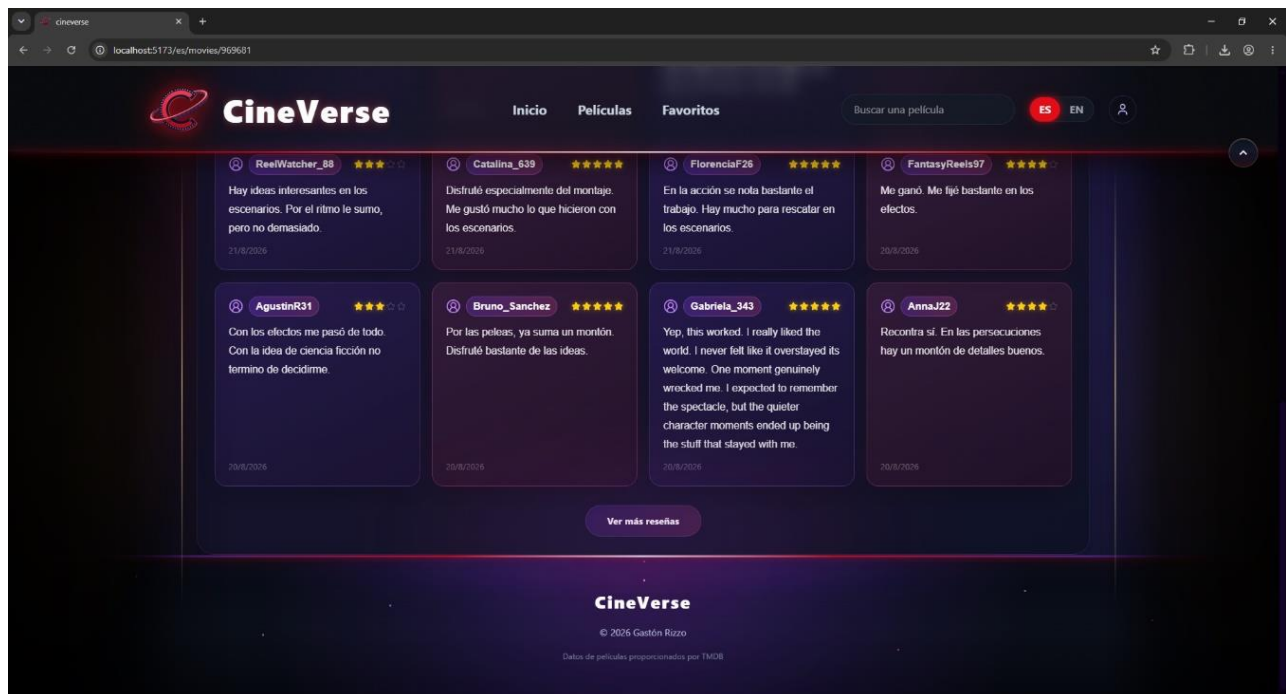

8.1 Signed-Out User

A user who is not signed in can open the Reviews tab, view the average and total, and read community reviews. In this state, the "Write a Review" button is not displayed.

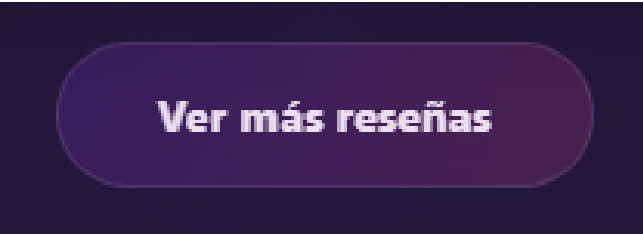

Reviews tab while signed out: reviews can be read, but not written.

8.2 Reading Reviews and Loading More

The list can continue with additional reviews.

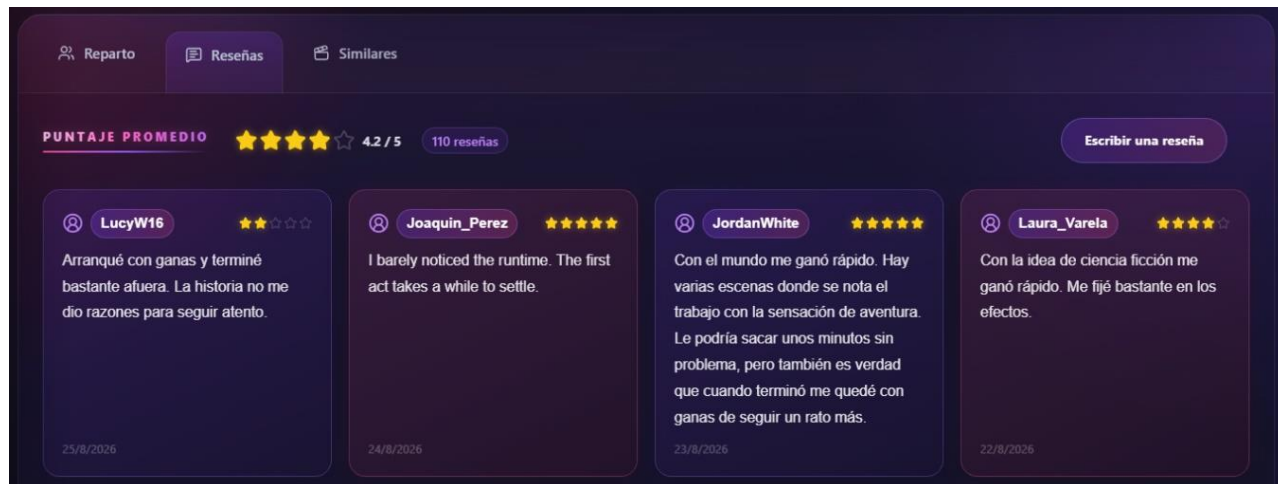

Ver más reseñas

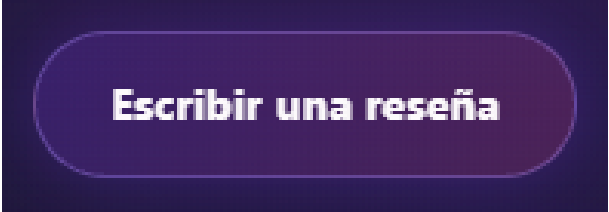

Button for loading the next batch of reviews.

Community reviews are loaded in pages. When "View More Reviews" is selected, the new cards are added below those already visible.

8.3 Writing a Review

Signed-in user on the Reviews tab.

Escribir una reseña

"Write a Review" button.

When the user is signed in, the button appears only if that user has not yet published a review for the movie. An account can have only one review per movie.

Esta película me parecio muy buena.

6/9/2026

Editar Eliminar

LucyW16 ★★★★★

Arranqué con ganas y terminé bastante afuera. La historia no me dio razones para seguir atento.

25/8/2026

Joaquin_Perez ★★★★★

I barely noticed the runtime. The first act takes a while to settle.

24/8/2026

JordanWhite ★★★★★

Con el mundo me ganó rápido. Hay varias escenas donde se nota el trabajo con la sensación de aventura. Le podría sacar unos minutos sin problema, pero también es verdad que cuando terminó me quedé con ganas de seguir un rato más.

23/8/2026

Laura_Varela ★★★★★

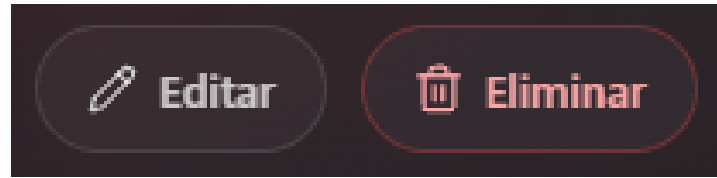

Con la idea de ciencia ficción me ganó rápido. Me fijé bastante en los efectos.

22/8/2026

Result after saving: the user's own review is displayed separately from the community reviews.

What changes after saving CineVerse retrieves the reviews again. This updates the user's own review, the average, the total, and the list using the state confirmed by the server.

8.4 Editing and Deleting Your Own Review

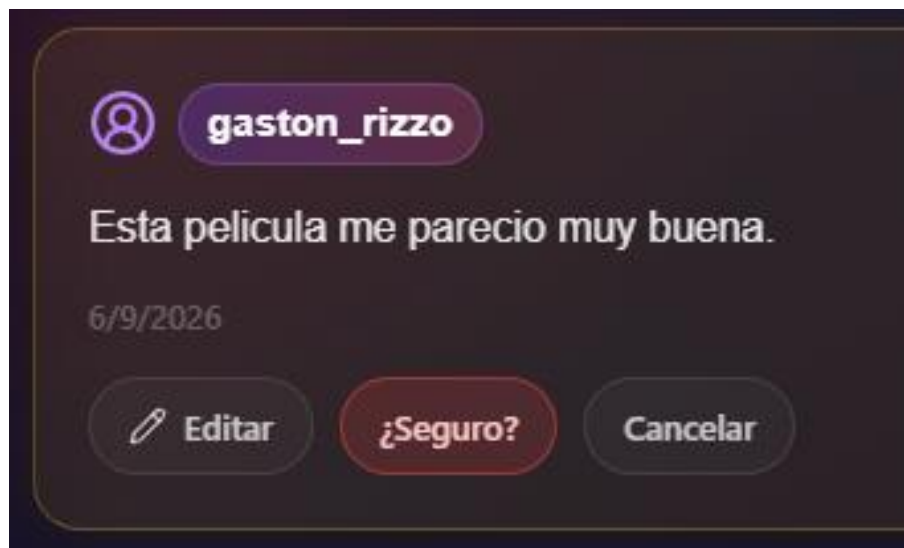

Controls available on the user's own review.

When "Edit" is selected, CineVerse reopens the form with the current rating and comment.

 A screenshot of a web form titled 'EDITAR RESEÑA'. At the top right, it says 'TU PUNTUACIÓN' followed by four yellow stars and two empty star outlines. Below this is a large text area containing the comment 'Esta película me parecio muy buena.' At the bottom right of the text area, it says '35 / 1000'. At the very bottom of the form are two buttons: 'Cancelar' (Cancel) and 'Guardar' (Save).

Form reopened in edit mode with the current review data.

After saving, CineVerse retrieves the reviews again to display the confirmed change. The "Delete" button starts a separate flow and asks for confirmation before deleting the review.

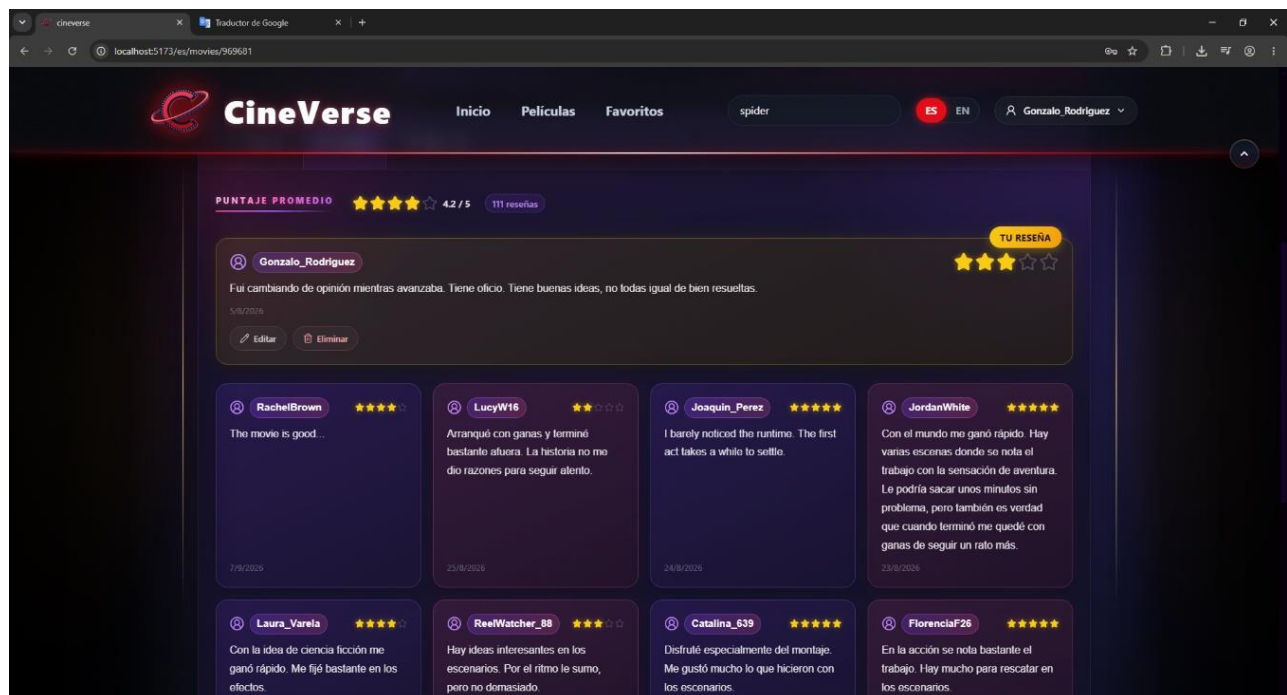

Confirmation before deletion.

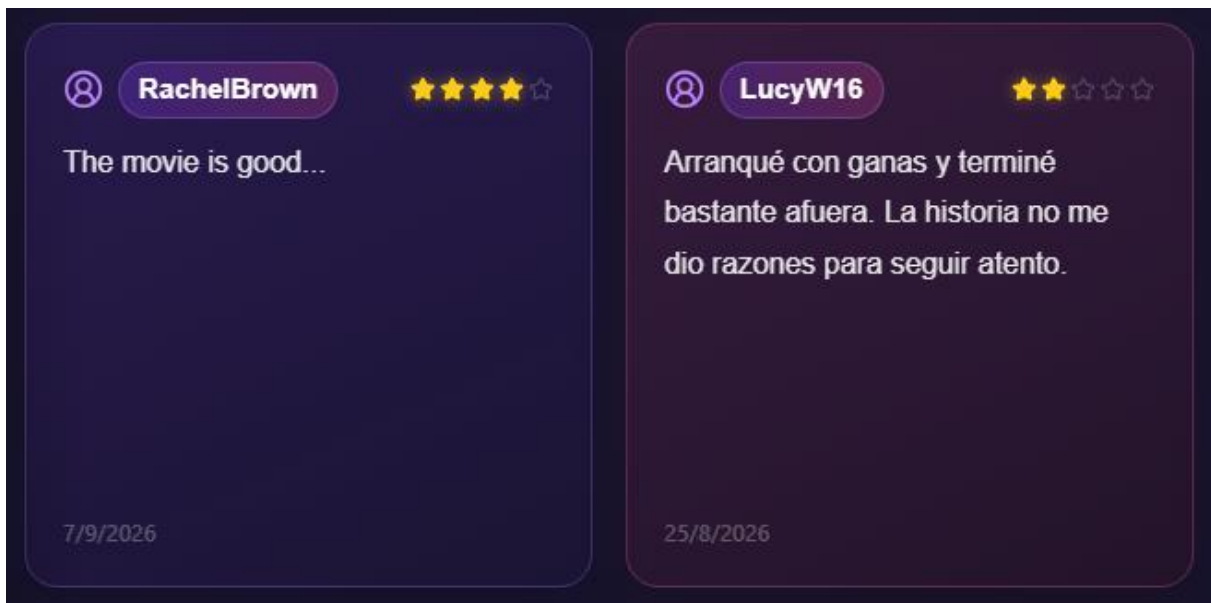

After deletion, the user's own review is no longer displayed.

8.5 Reviews Written by Other Users

Example of a movie with reviews from other users.

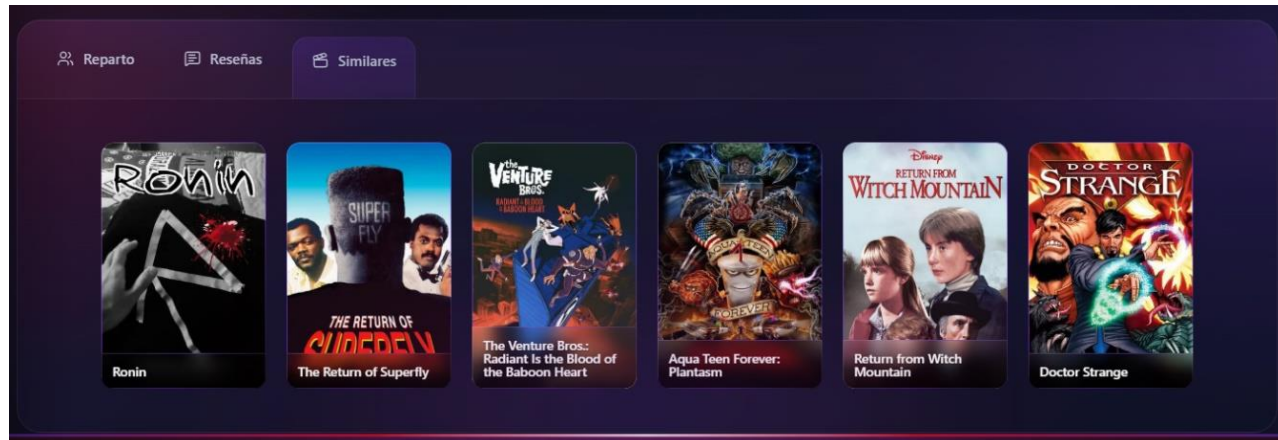

Two reviews from different users.

Reviews may be written in Spanish or English. Changing the interface language does not translate text written by users.

9. Similar Movies

The Similar tab displays titles related to the current movie based on data provided by TMDB.

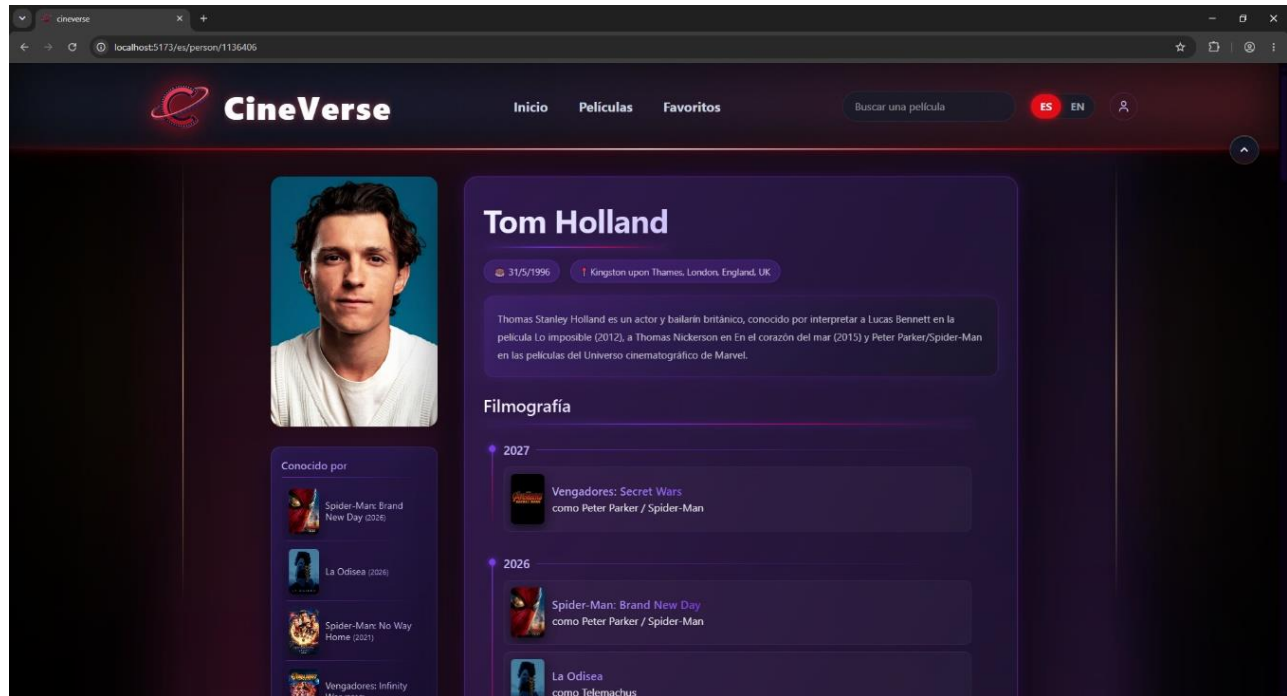

Similar movies displayed on the details page.

Language of this tab. In the documented version, the similar-movies request always uses "en-US". As a result, some titles or text may appear in English even when the rest of the interface is in Spanish.

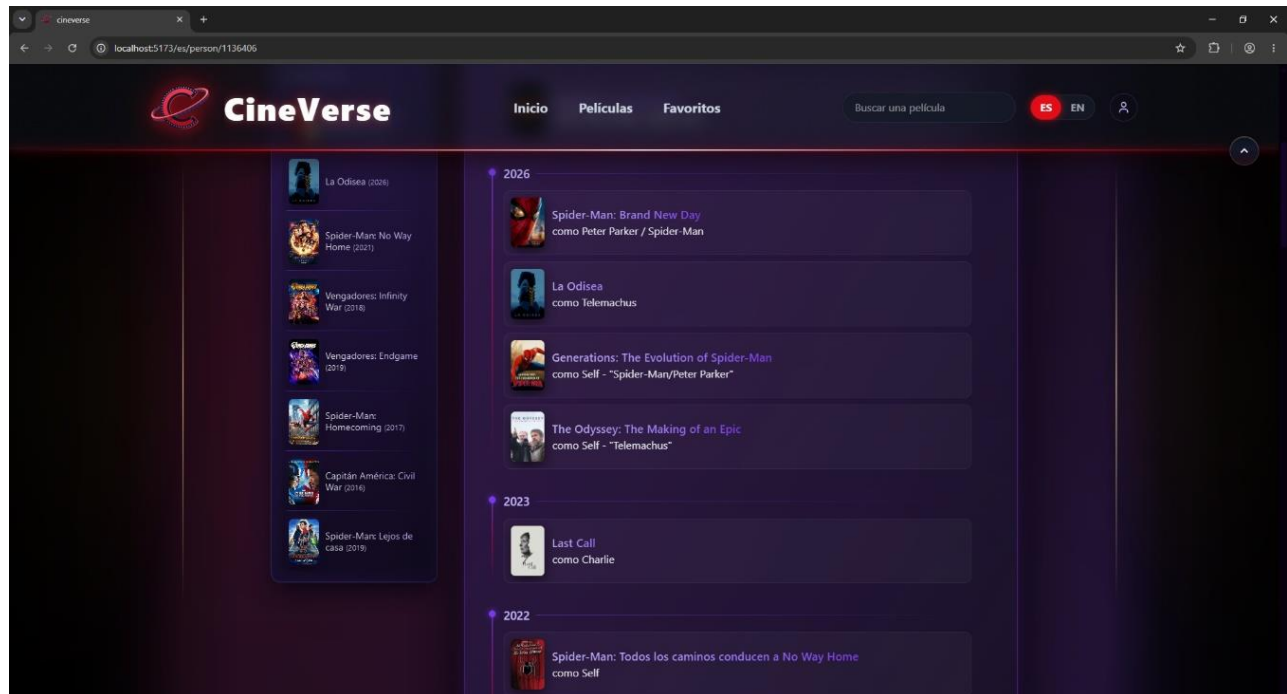

Source of the recommendation TMDB determines the relationship between movies. CineVerse displays those results, so the degree of similarity may vary by title.

10. Actor Details

Selecting a cast member opens a page with that actor's information and movie history.

Tom Holland profile.

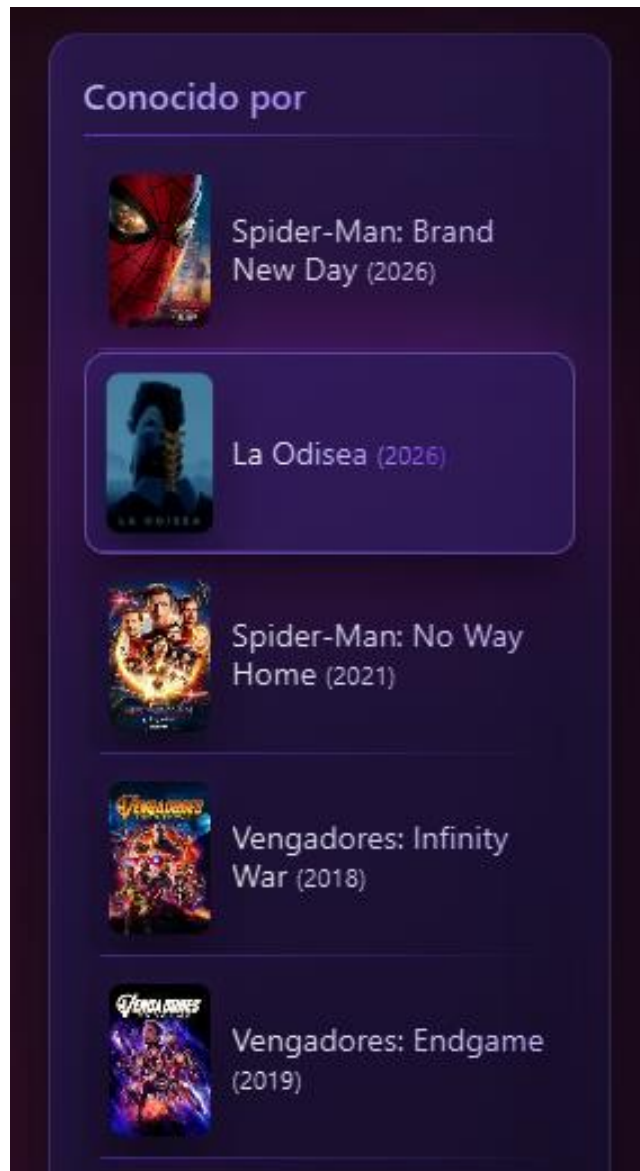

Continuation of the filmography.

11. Known For and Filmography

The actor profile separates featured movies from the filmography list displayed by CineVerse.

The filmography is organized by year and omits credits for which TMDB does not provide a release date. For this reason, it should not be interpreted as a necessarily complete list of the actor's entire career.

"Known For" panel.

Filmografía

2027

 **Vengadores: Secret Wars**
como Peter Parker / Spider-Man

2026

 **Spider-Man: Brand New Day**
como Peter Parker / Spider-Man

 **La Odisea**
como Telemachus

 **Generations: The Evolution of Spider-Man**
como Self - "Spider-Man/Peter Parker"

Filmography organized by year.

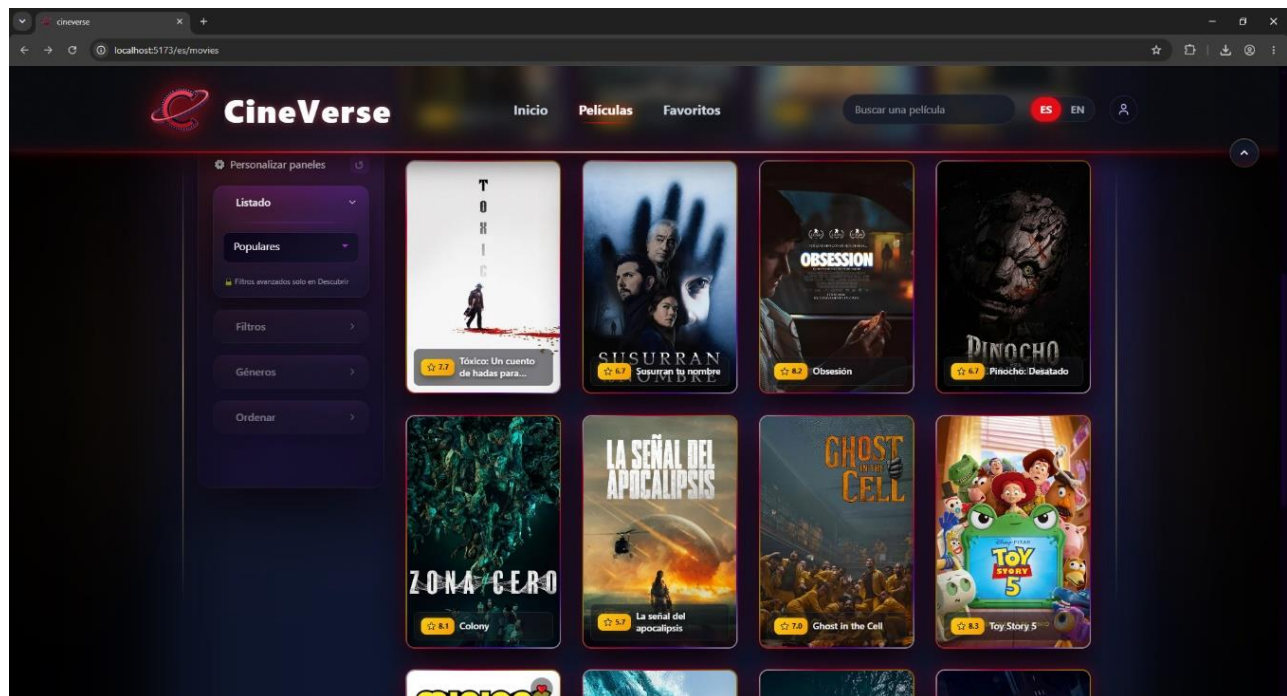

Selecting a movie from either of these sections takes the user back to that movie's details page.

12. Movie Explorer

By default, the Movies section opens a grid of titles and a side panel with options for list type, search, years, rating, genres, and sorting.

Movie Explorer.

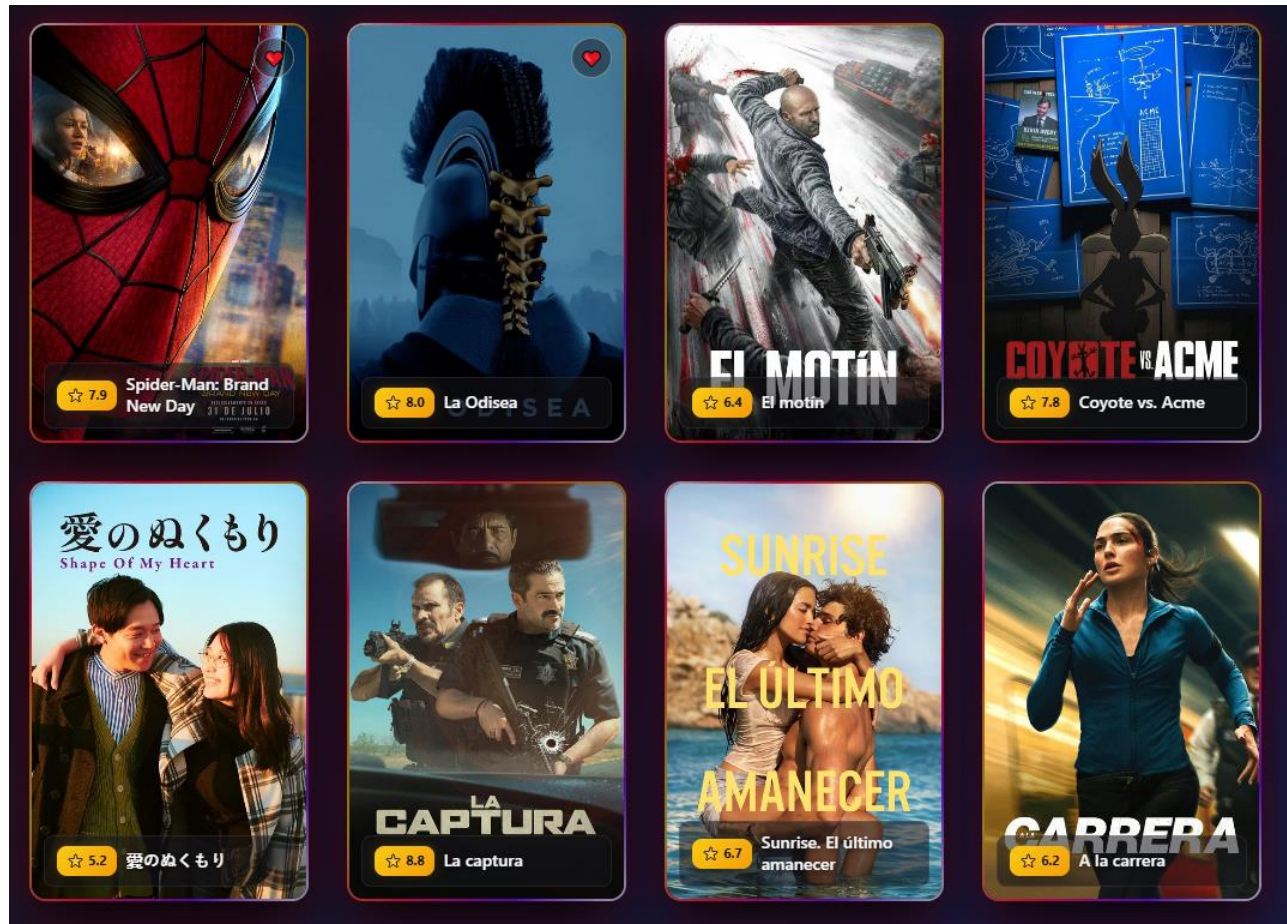

Continuation of the grid when scrolling down.

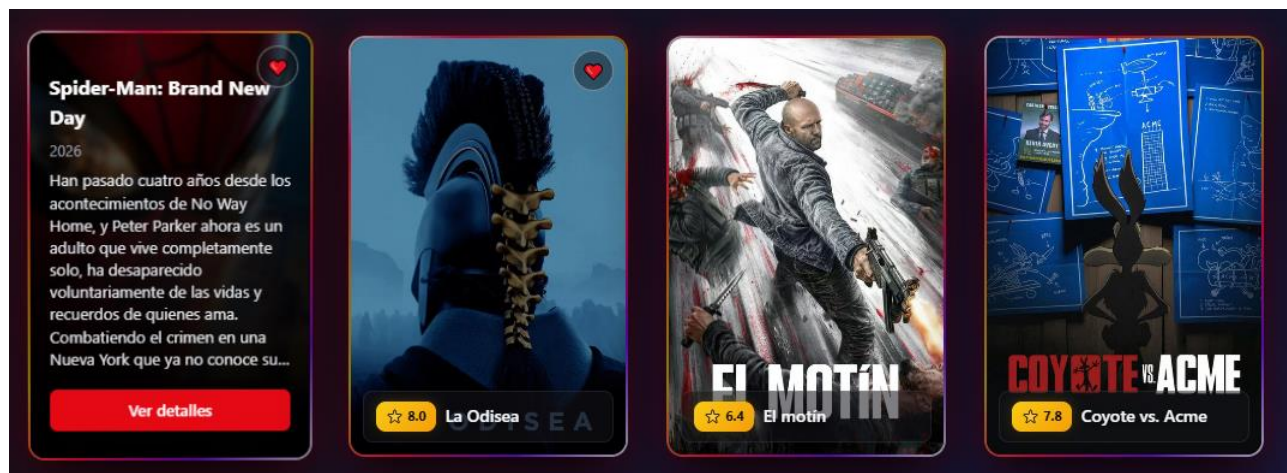

The cards are displayed in a grid, while the filter panel remains available on the left.

13. Movie Cards

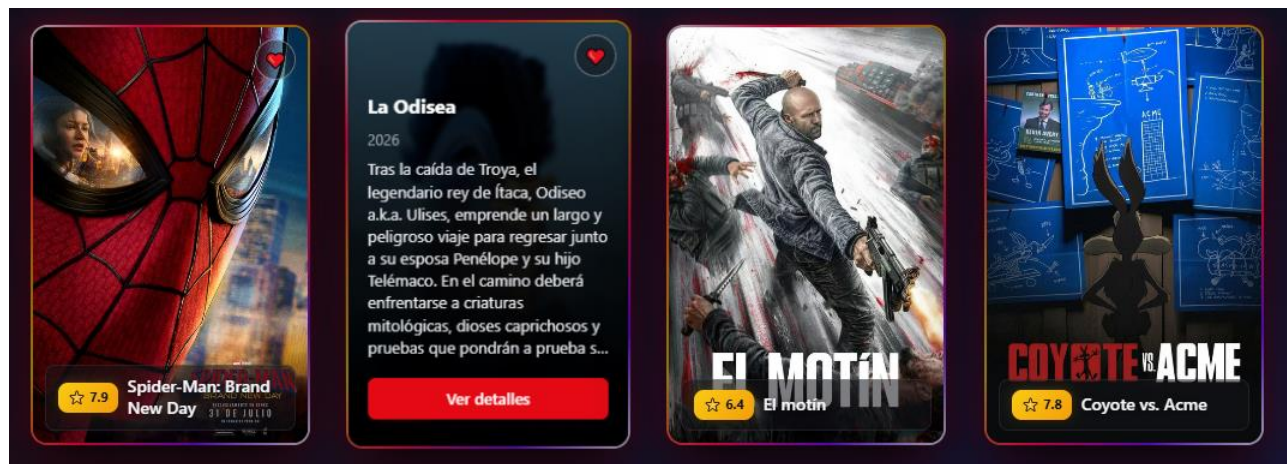

Each card summarizes a movie and provides direct access to its details.

Example of a card grid.

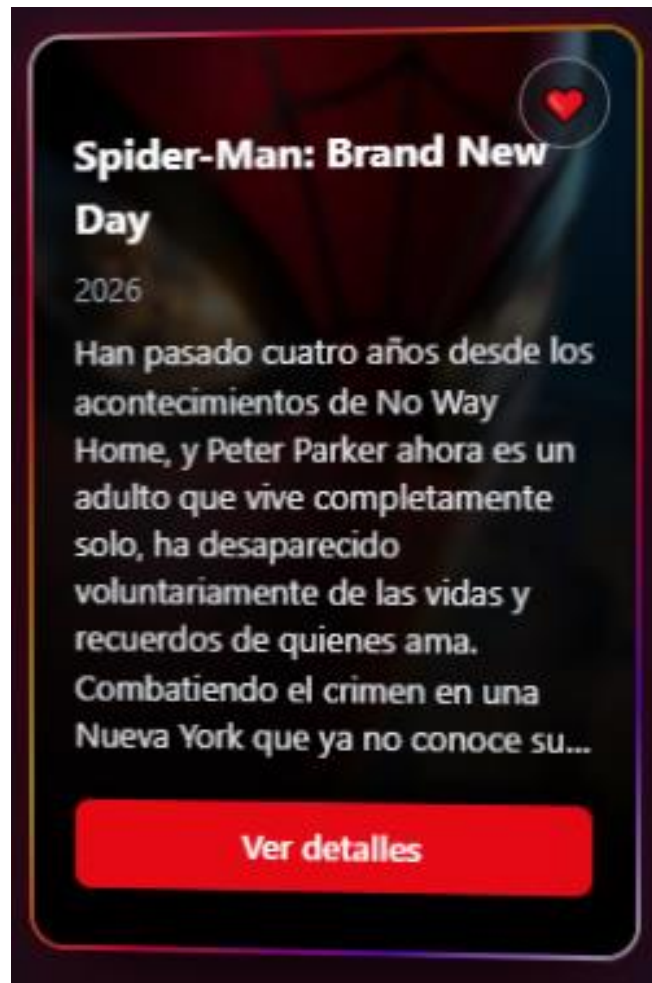

Hovering over a card displays the synopsis and the "View Details" button.

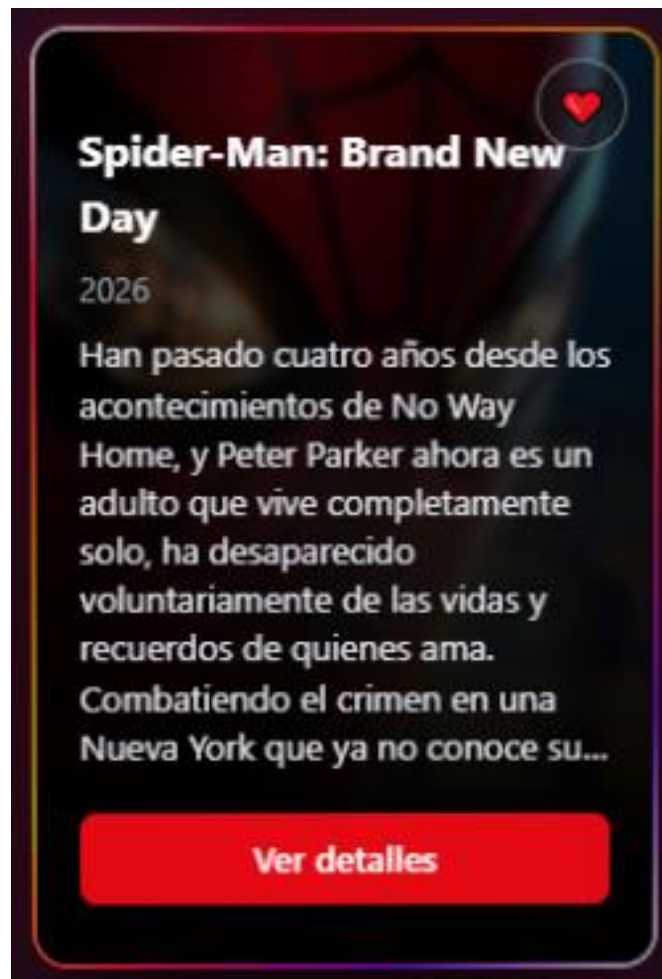

Another card state while hovering over the grid.

Favorite Control and Card Motion

The heart icon in the corner lets the user add or remove the movie from Favorites. The card also changes its tilt slightly according to the pointer position.

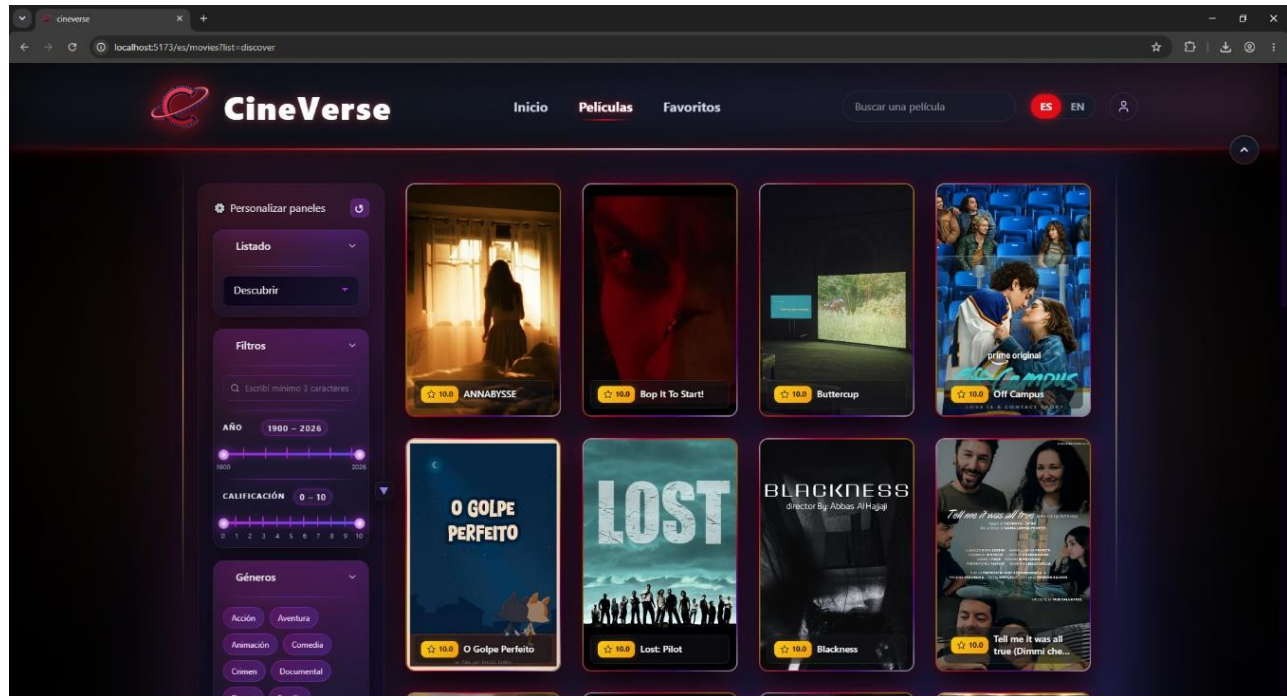

Card tilted to one side.

Card at another angle.

14. Filters

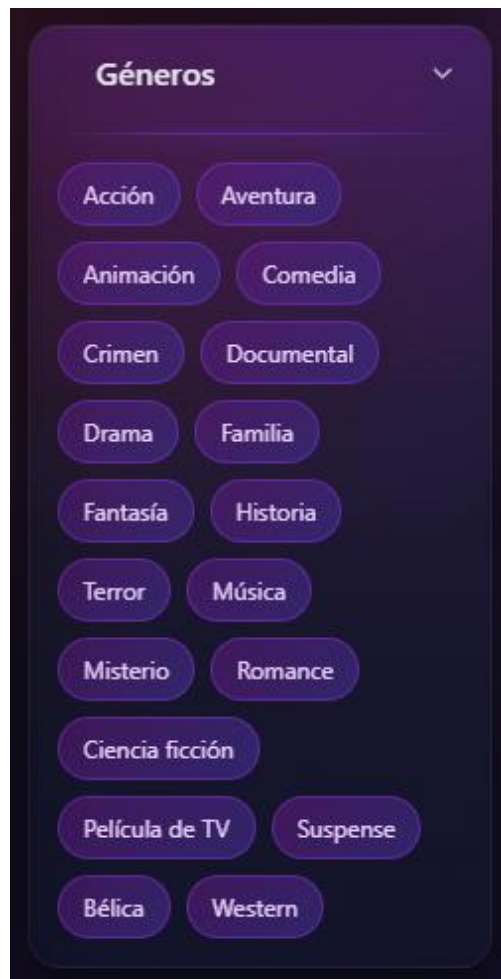

The side panel controls which movies appear in the grid. Advanced filters are used with the Discover list.

Side panel next to the grid.

Search, year range, and rating.

Genre selection.

List options.

Sorting options.

Available lists Discover enables the detailed filters. Popular, Now Playing, Upcoming, and Top Rated can also be selected.

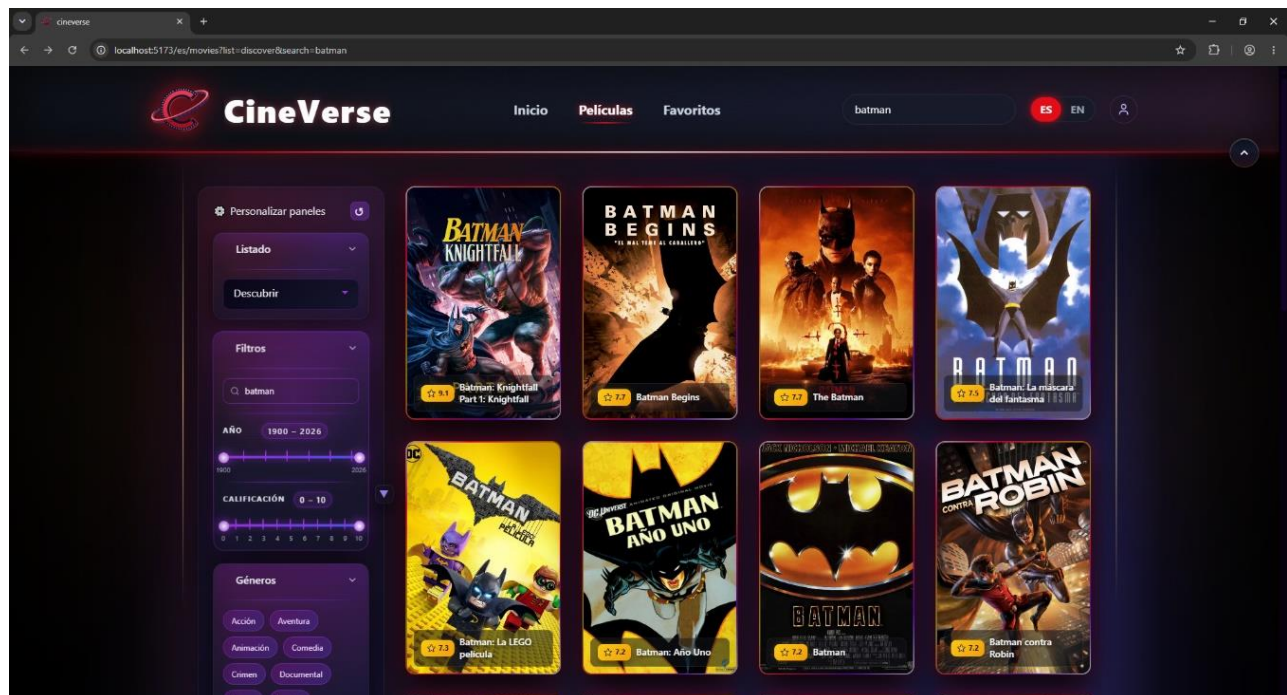

15. Search Examples

A search can begin with text and then be combined with years, rating, and genres to narrow the results.

15.1 Searching for "Batman"

Search text.

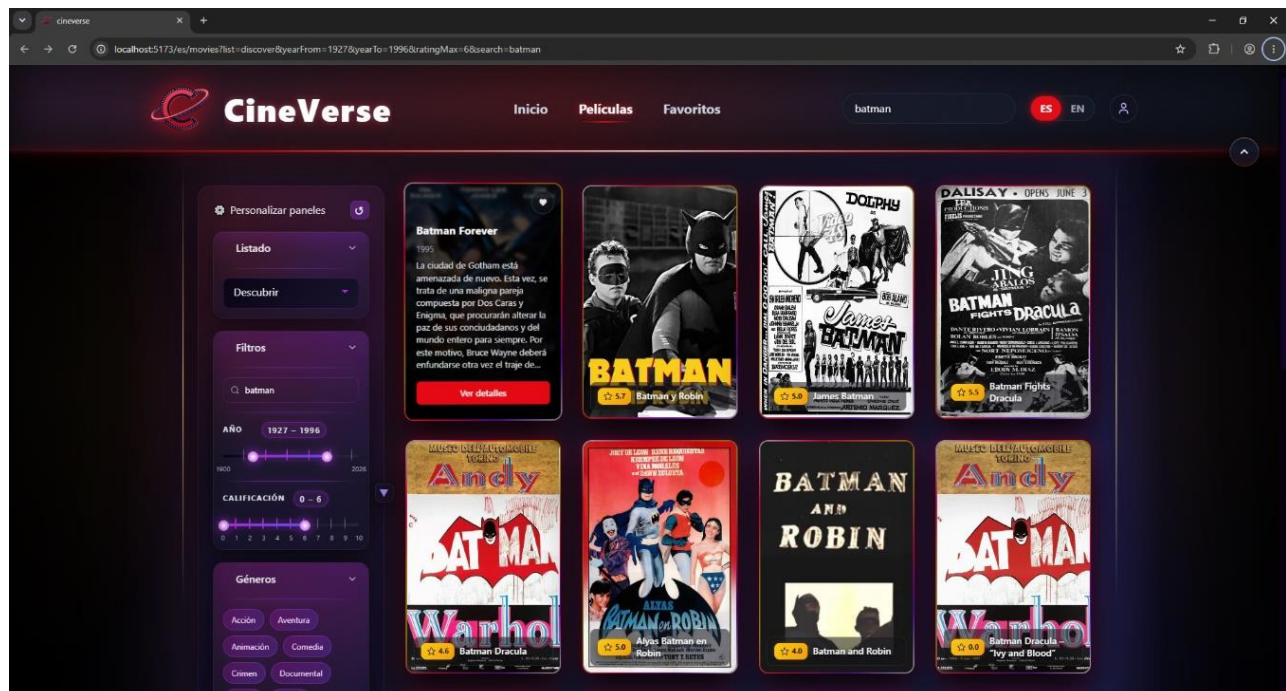

Results related to Batman.

15.2 Adding a Year Range and Rating

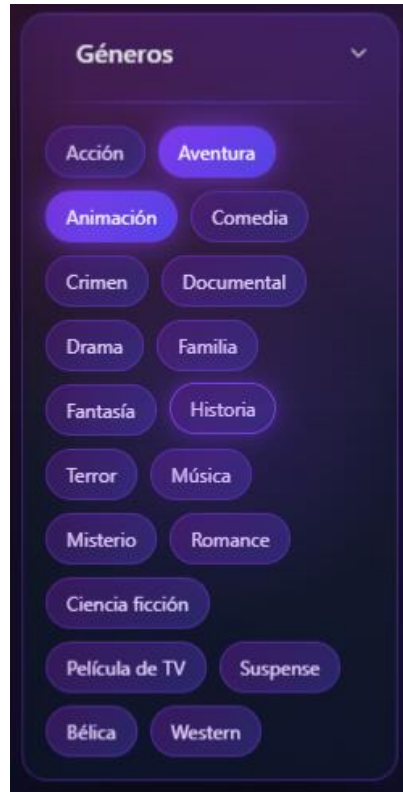

Batman + years 1927-1996 + rating 0-6.

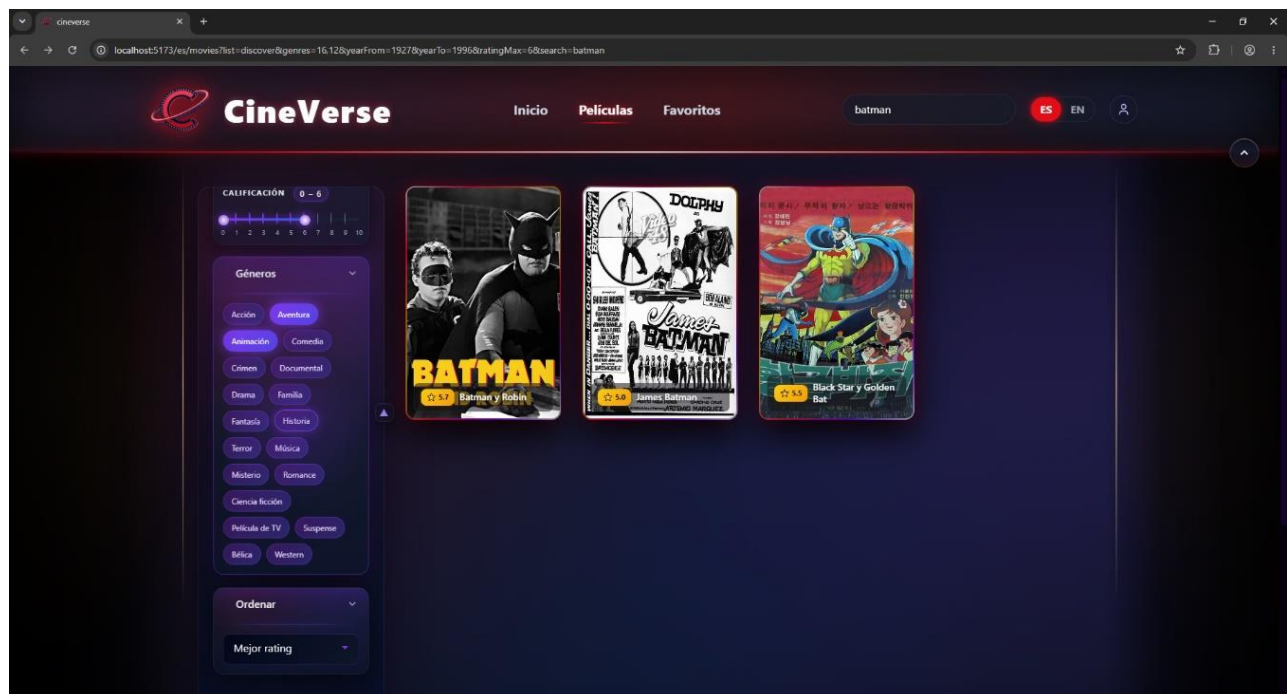

Results after applying additional filters.

15.3 Adding Genres

Example with selected genres.

Final result of the combined example.

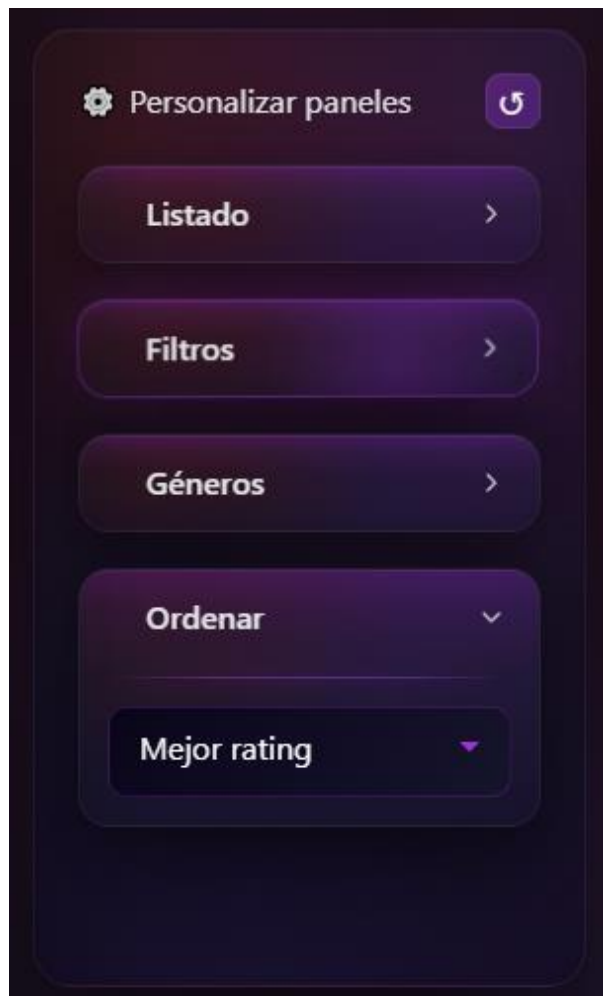

Search from the header The search box in the header also opens the explorer and places the search text in the corresponding filter.

16. Panel Customization

The user can change the order of the sections in the filter panel. The goal is to arrange the options according to the user's preferred workflow.

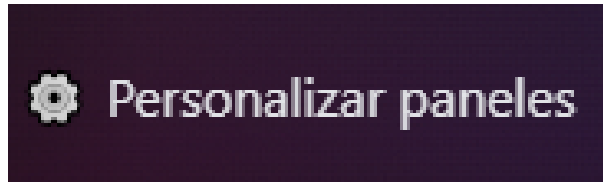

Panel before customization.

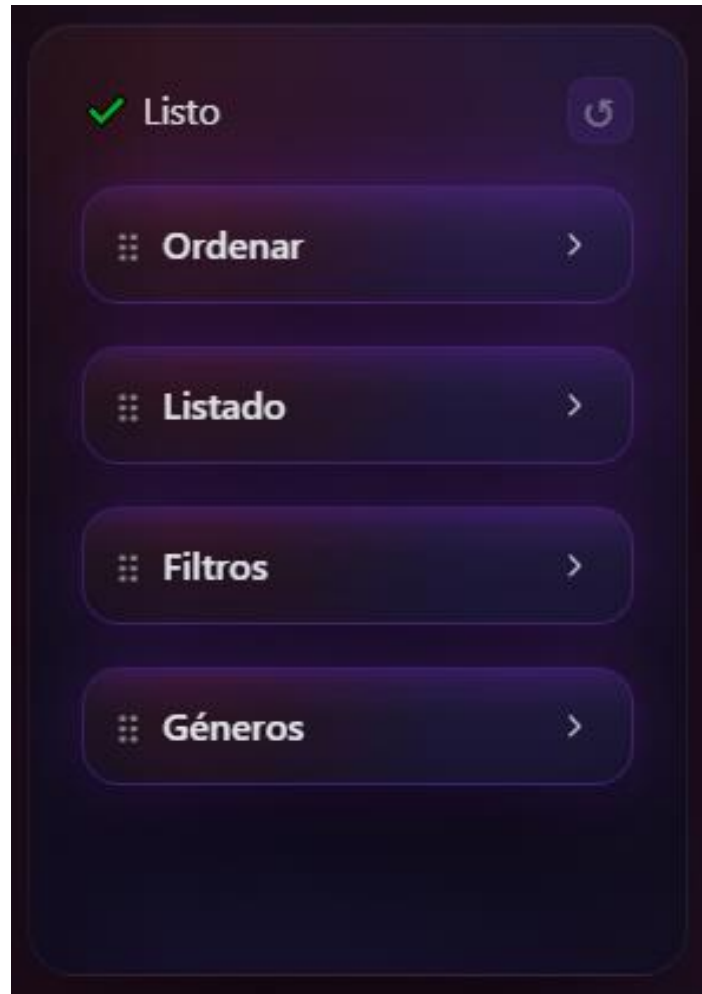

Another state of the standard panel.

Activating customization mode

"Customize Panels" button.

The sections become draggable elements.

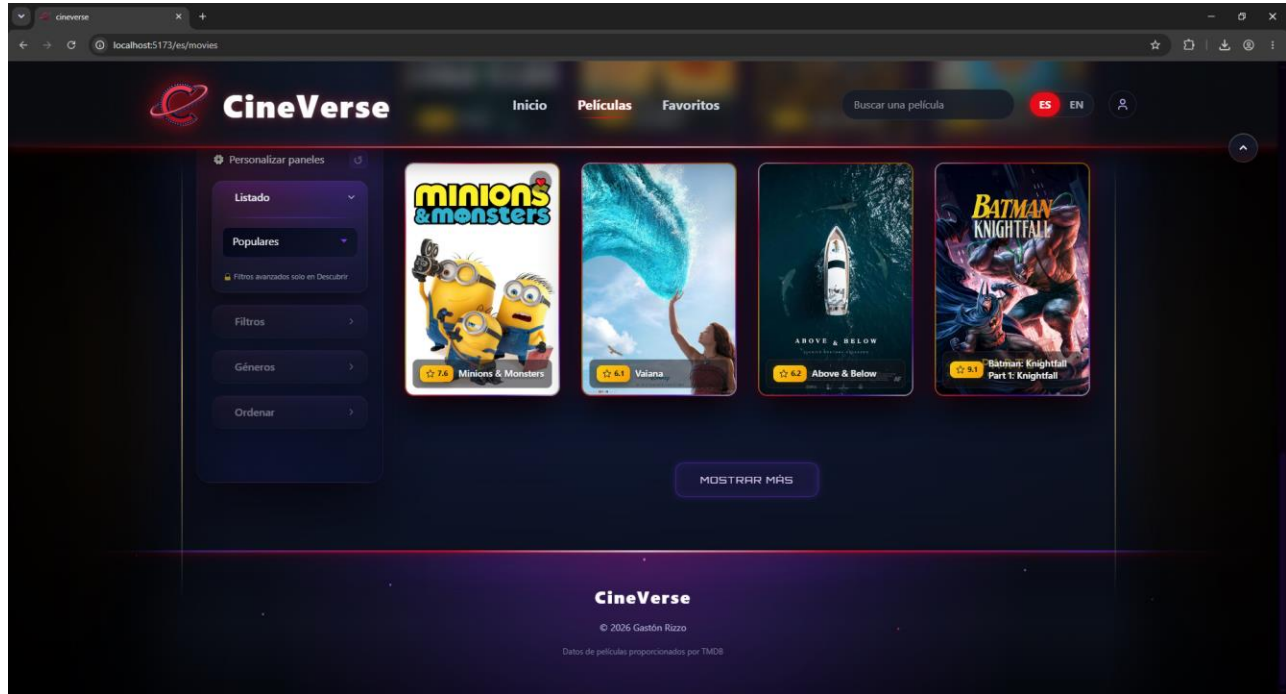

Example with a different order.

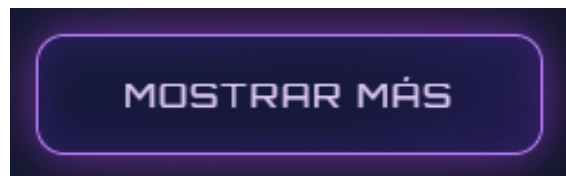

Persistence The panel order is stored in the browser so it can be restored on later visits. The reset button returns the panels to their original arrangement.

17. Loading More Movies

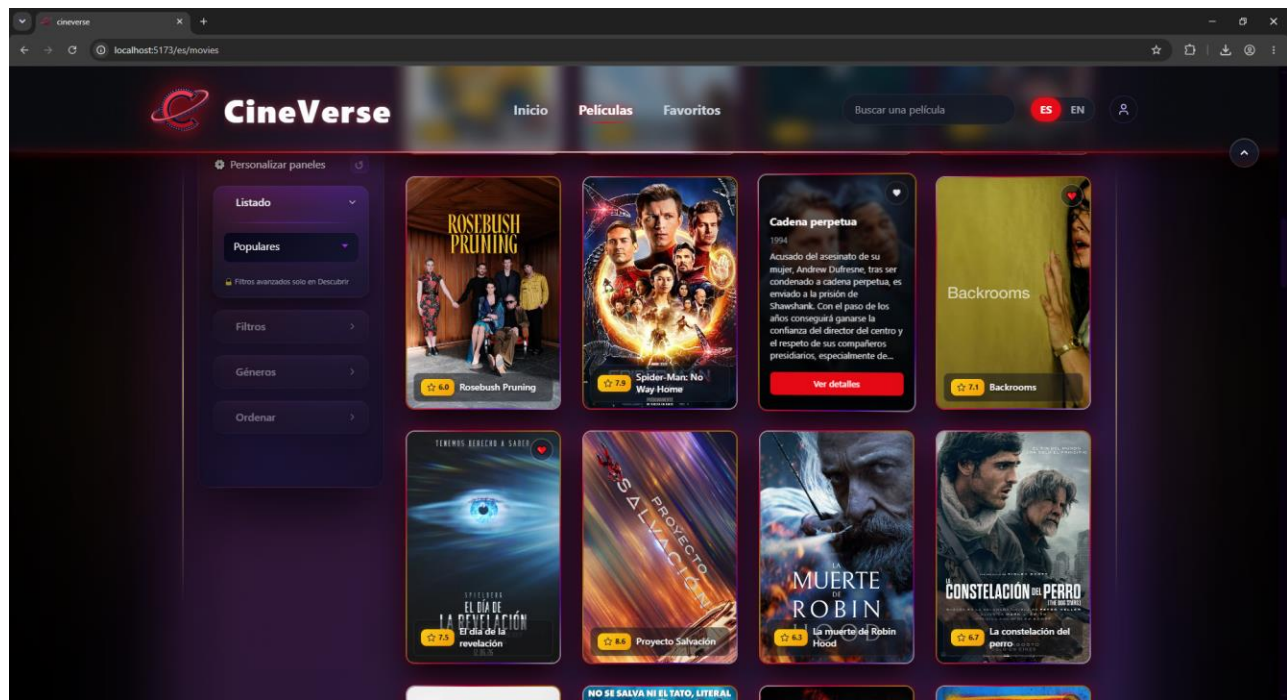

The explorer does not try to display all results at once. It first shows one batch and allows the user to continue loading more.

Bottom of the first batch, with "Show More".

"Show More" button.

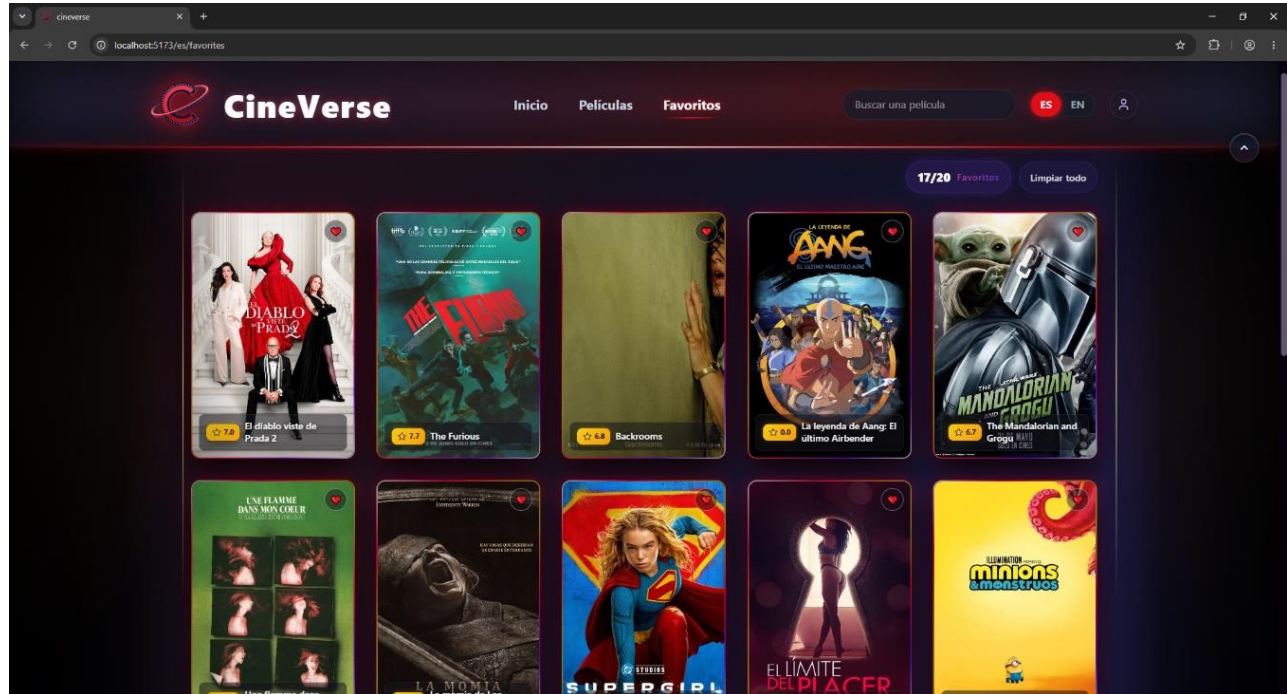

After continuing, new movies appear and loading can continue as the user scrolls down.

Once additional loading has been activated, CineVerse can request new pages automatically when the user approaches the end of the grid.

18. Favorites

Favorites contains the movies the user marked with the heart icon. Signing in is not required, and the list is stored in this browser.

Favorites page with several saved movies.

Favorites counter and "Clear All" button.

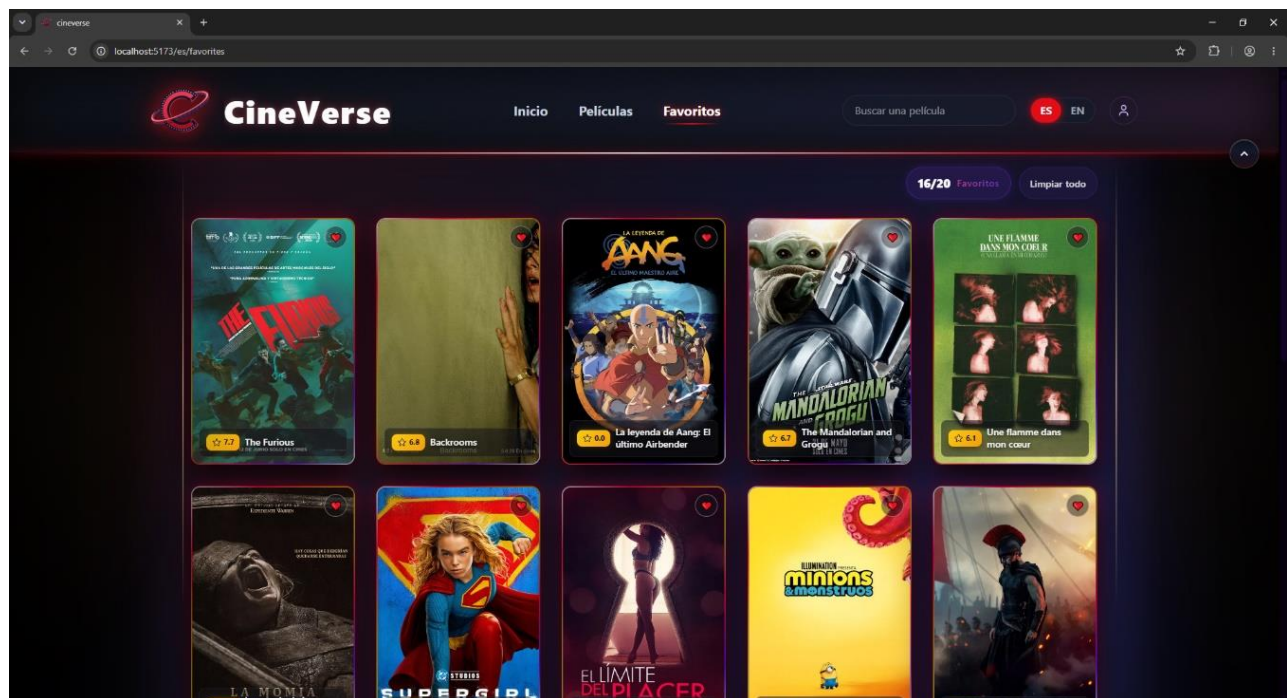

Limit CineVerse allows up to 20 favorites to be saved. The list belongs to the current browser and is not associated with the user's account.

18.1 Removing a Movie

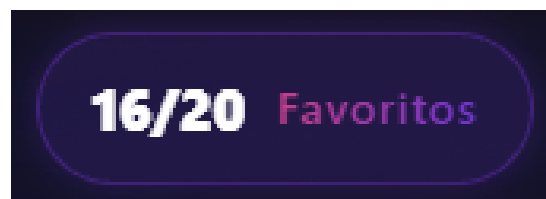

Card within Favorites.

Hovering over the heart icon of a saved movie displays the option to remove it. After the click, the card disappears and the counter decreases.

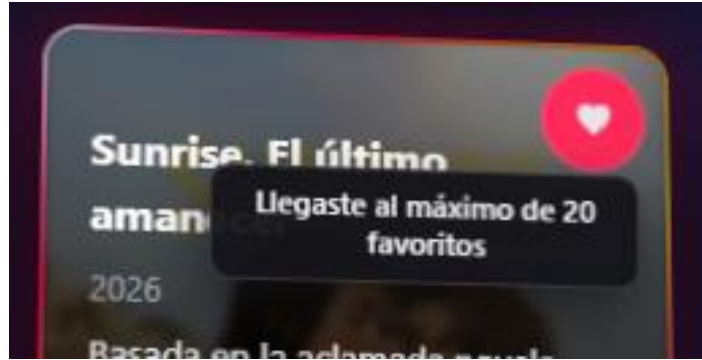

Grid after removing a movie.

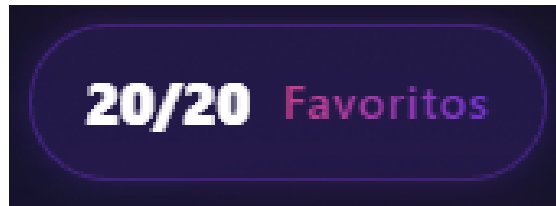

Updated counter.

18.2 Limit of 20

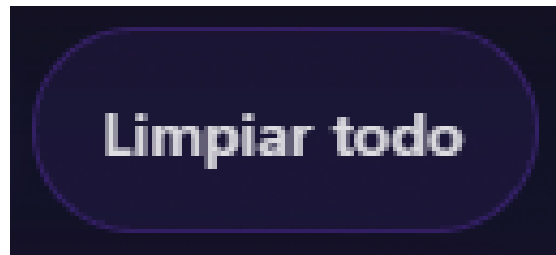

Message displayed when attempting to exceed the maximum.

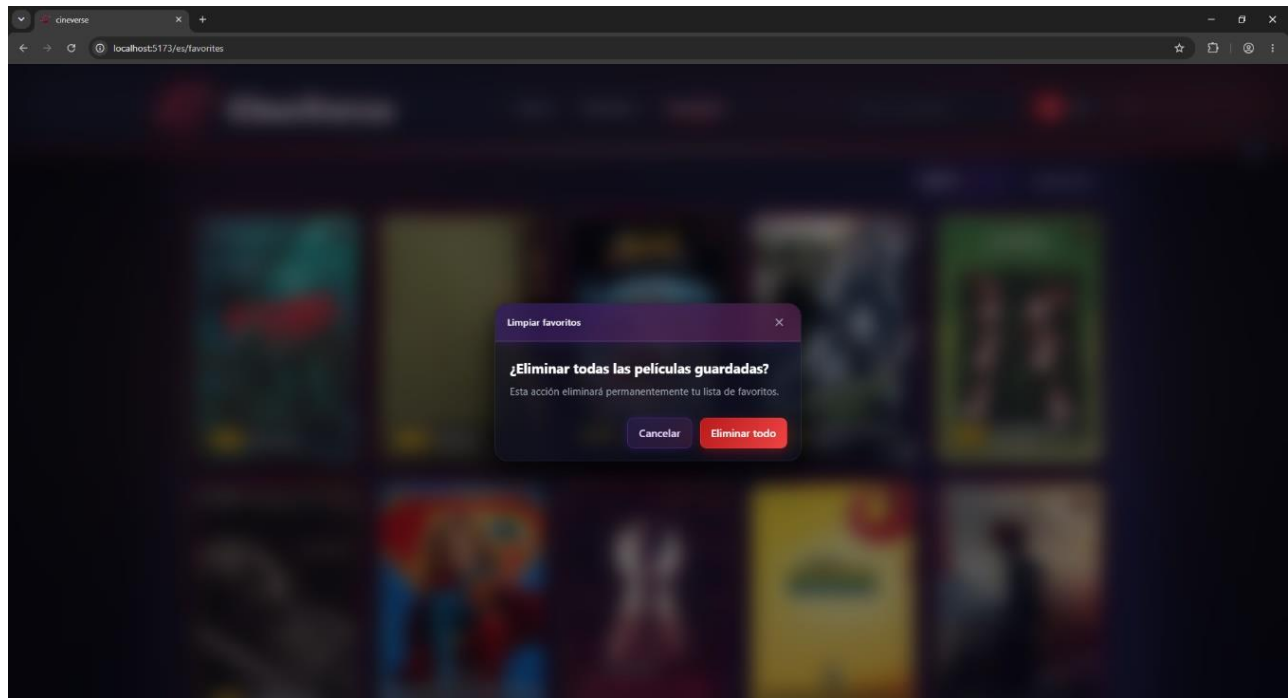

Counter at 20/20.

When the list already contains 20 titles, CineVerse does not add another movie and displays a limit notice on the explorer cards.

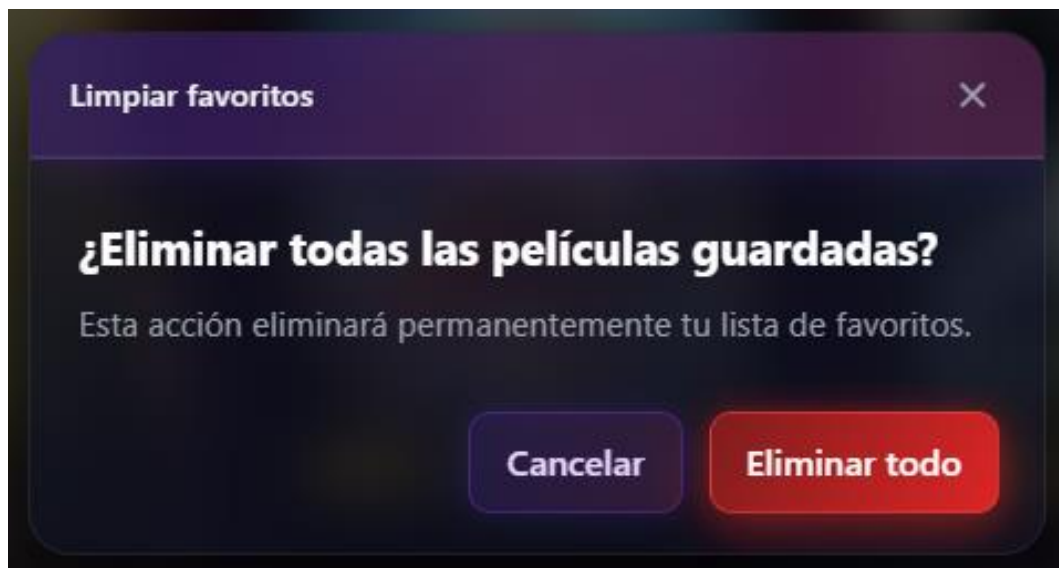

18.3 Clearing All Favorites

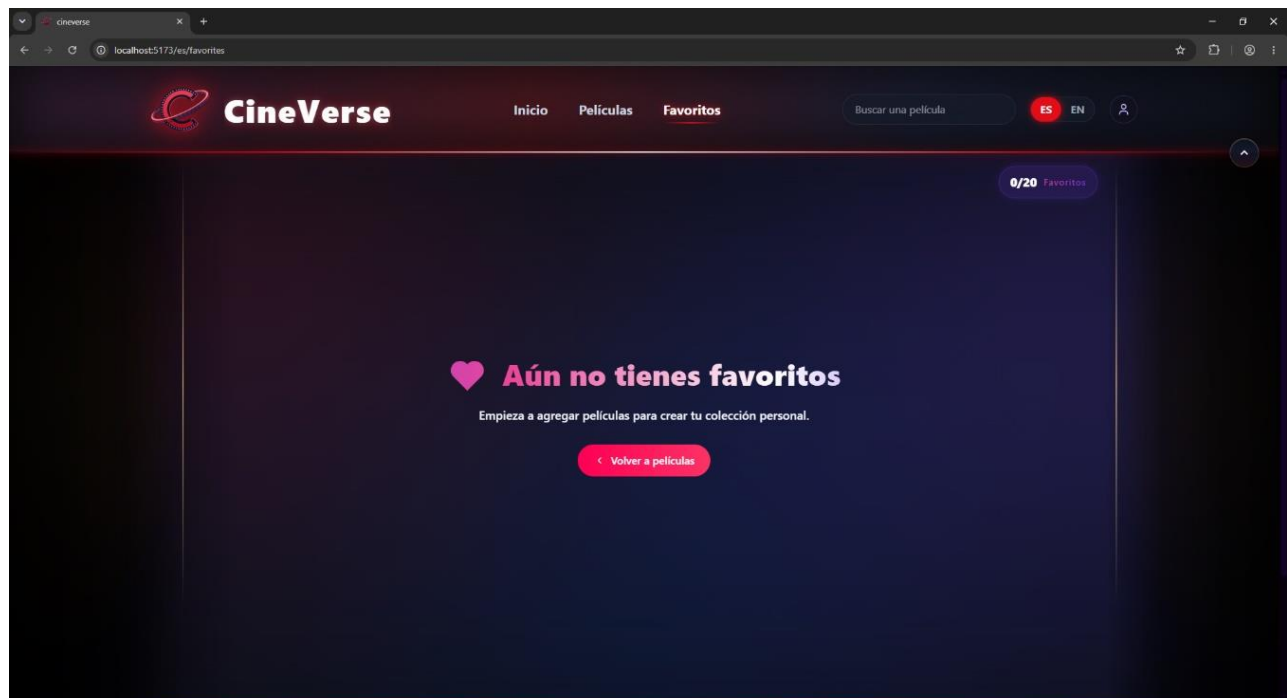

"Clear All" button.

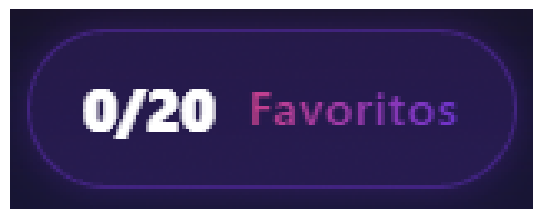

Confirmation window over the page.

Close-up of the confirmation.

Empty state after removing all favorites.

Counter at 0/20.

19. Language Switching

The ES and EN buttons change the visible language of the application. Routes, interface text, and the main movie and actor requests use the selected language. The Similar tab is an exception in the current version: its request uses "en-US", so some text may appear in English there.

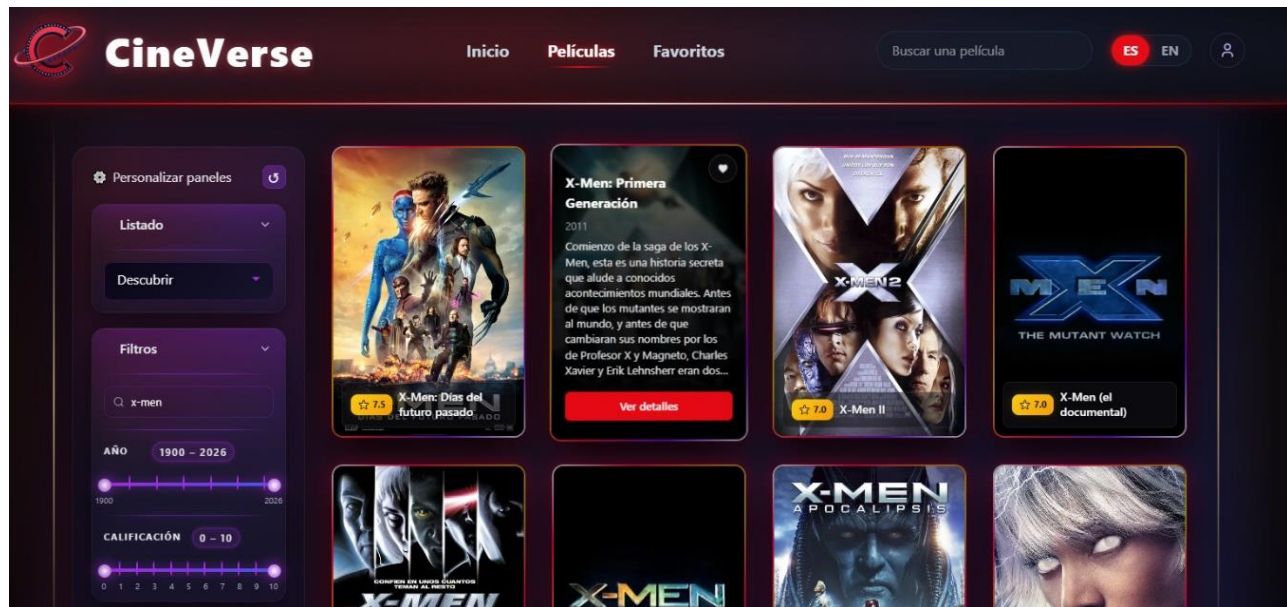

EN selected.

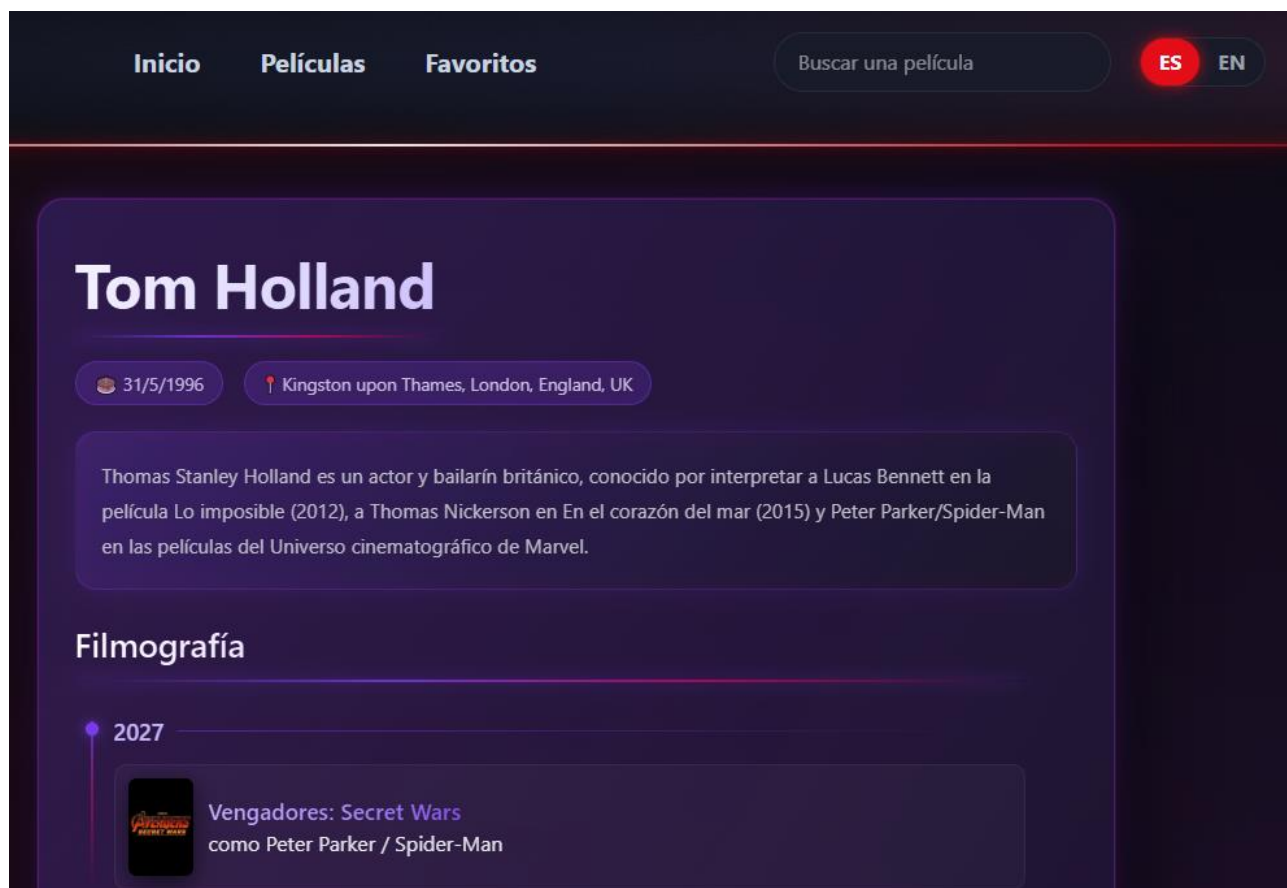

ES selected.

Filters when switching languages In the current version, when the language is changed from the explorer, some filter parameters may return to their initial state.

Example in Spanish

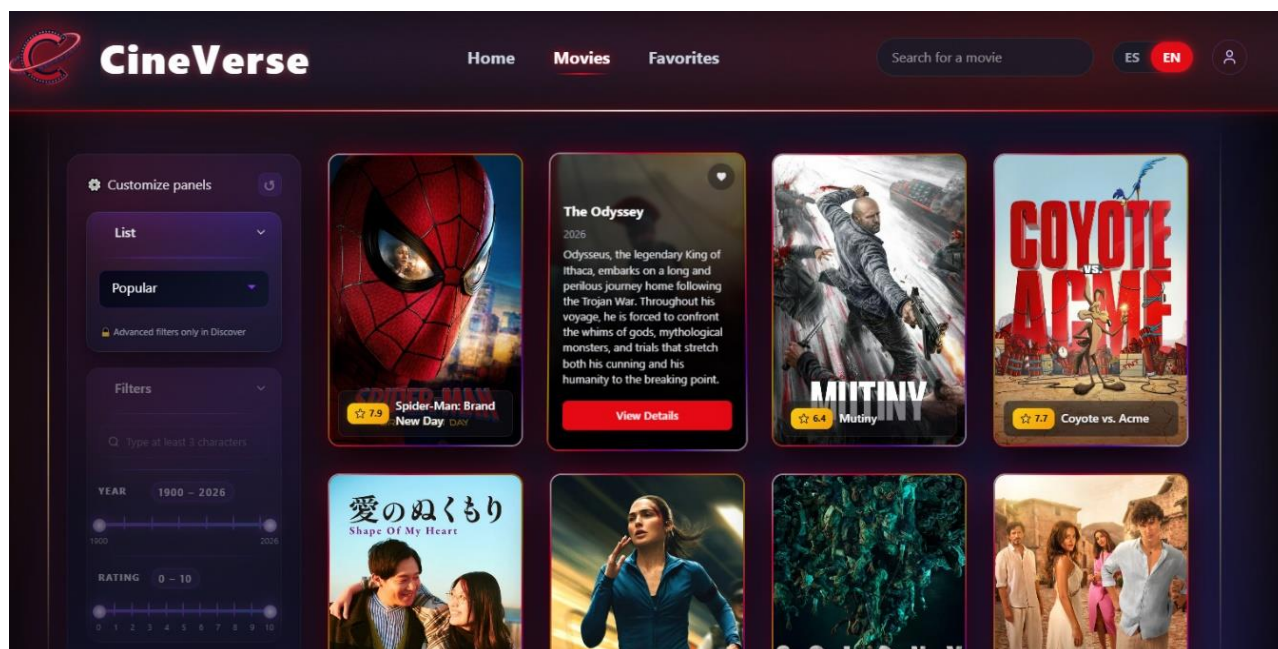

Explorer in Spanish.

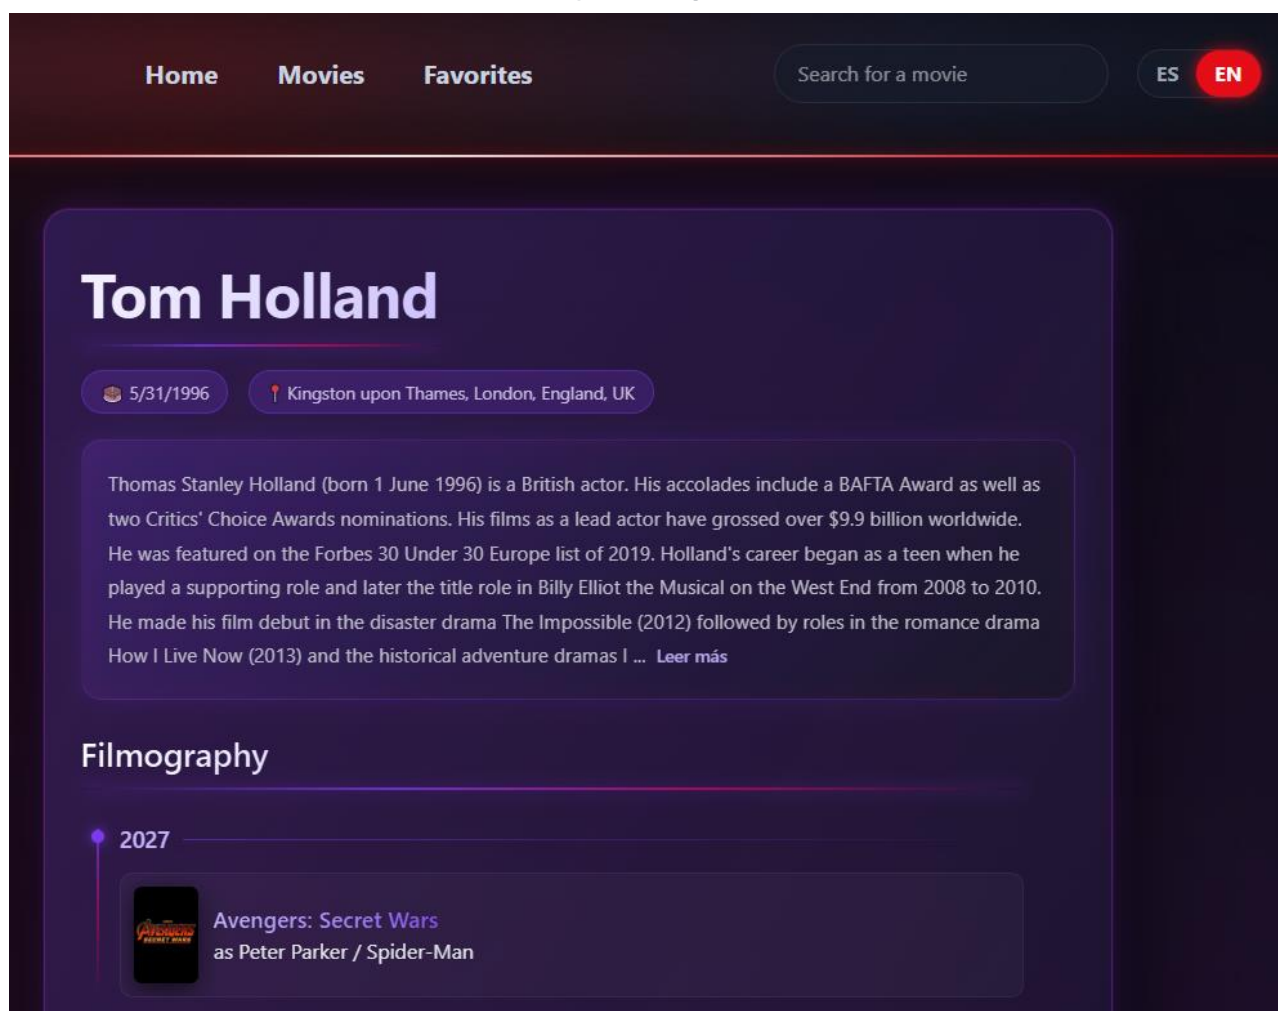

Actor details in Spanish.

Example in English

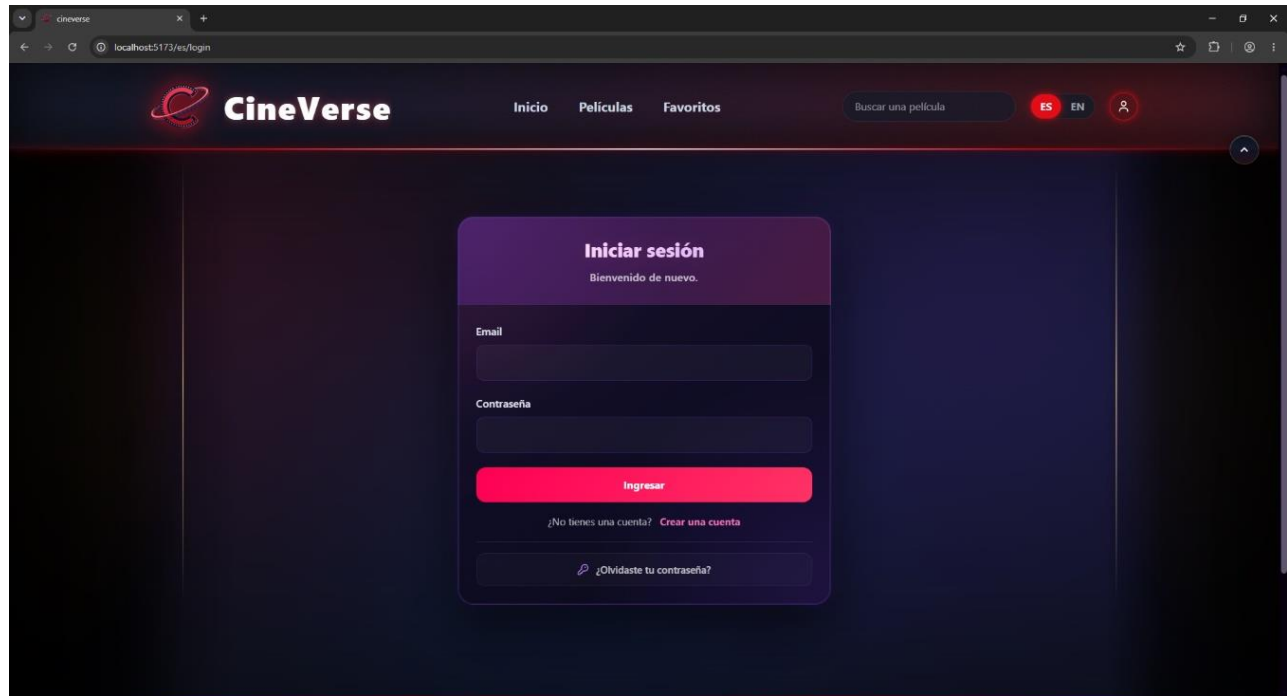

Explorer in English.

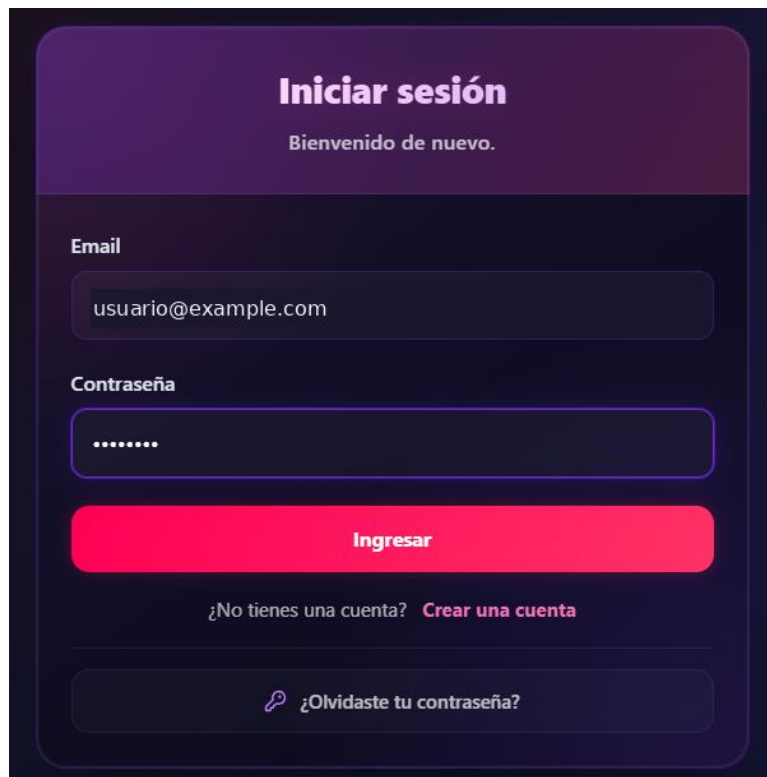

Actor details in English.

20. Sign In

Sign-in options are accessed from the icon in the header. From the same screen, users can go to registration or password recovery.

Sign-in screen.

Expanded form.

Invalid Credentials

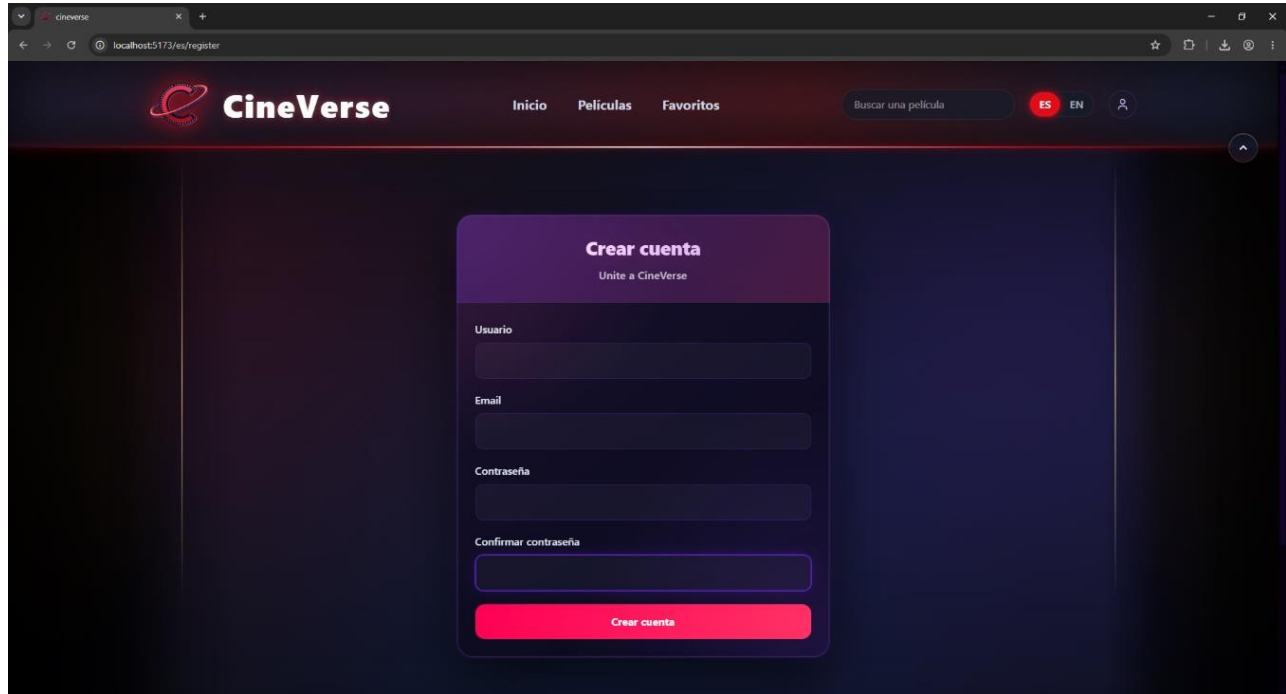

Message displayed when the credentials are not valid.

CineVerse uses a generic invalid-credentials message and does not indicate whether the email address or the password specifically was incorrect.

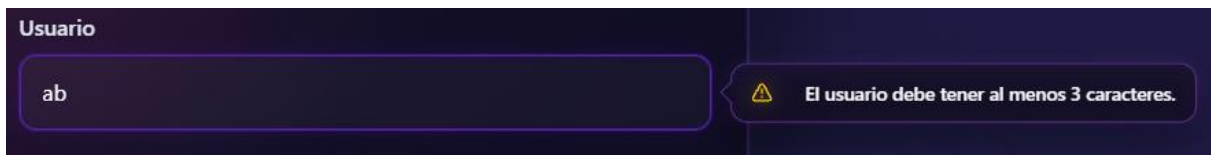

21. Registration

Creating an account requires a username, email address, password, and password confirmation. The form reports errors before invalid data is submitted.

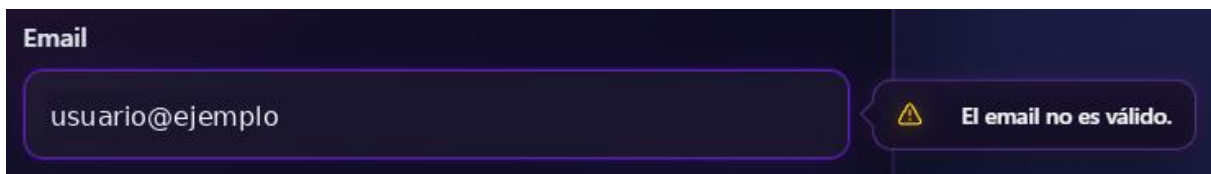

A screenshot of a web browser showing the CineVerse registration page. The browser's address bar displays 'localhost:5173/es/register'. The page has a dark theme with a purple header. The header includes the CineVerse logo, navigation links for 'Inicio', 'Películas', and 'Favoritos', a search bar with the placeholder 'Buscar una película', and language toggles for 'ES' and 'EN'. The main content area features a central purple box titled 'Crear cuenta' with the subtitle 'Únete a CineVerse'. Inside this box are four input fields labeled 'Usuario', 'Email', 'Contraseña', and 'Confirmar contraseña', followed by a red 'Crear cuenta' button.

Registration screen.

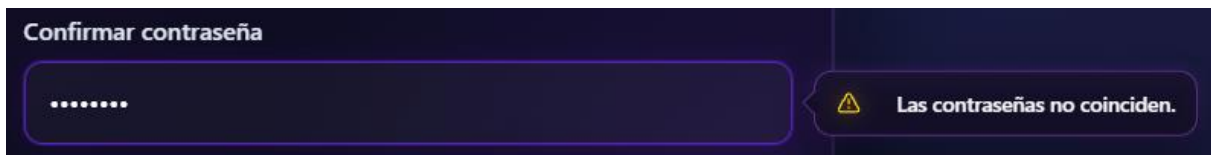

21.1 Validation Feedback

A close-up of the 'Usuario' input field. The field contains the text 'ab'. To the right of the field, a yellow warning icon is followed by the message 'El usuario debe tener al menos 3 caracteres.'

Example of username validation.

A close-up of the 'Email' input field. The field contains the text 'usuario@ejemplo'. To the right of the field, a yellow warning icon is followed by the message 'El email no es válido.'

Example of email validation.

A close-up of the 'Confirmar contraseña' input field. The field contains masked characters represented by dots. To the right of the field, a yellow warning icon is followed by the message 'Las contraseñas no coinciden.'

Example of password confirmation validation.

21.2 Password Requirements

The screenshot shows a dark-themed password form with two input fields: "Contraseña" and "Confirmar contraseña". The "Contraseña" field contains a single character. To the right, a list of requirements is displayed with bullet points: "Mínimo: 8 caracteres", "Una mayúscula", "Una minúscula", "Un número", and "Un símbolo". A progress bar below the list is empty, and the word "Débil" is shown in red text.

Requirements not yet met.

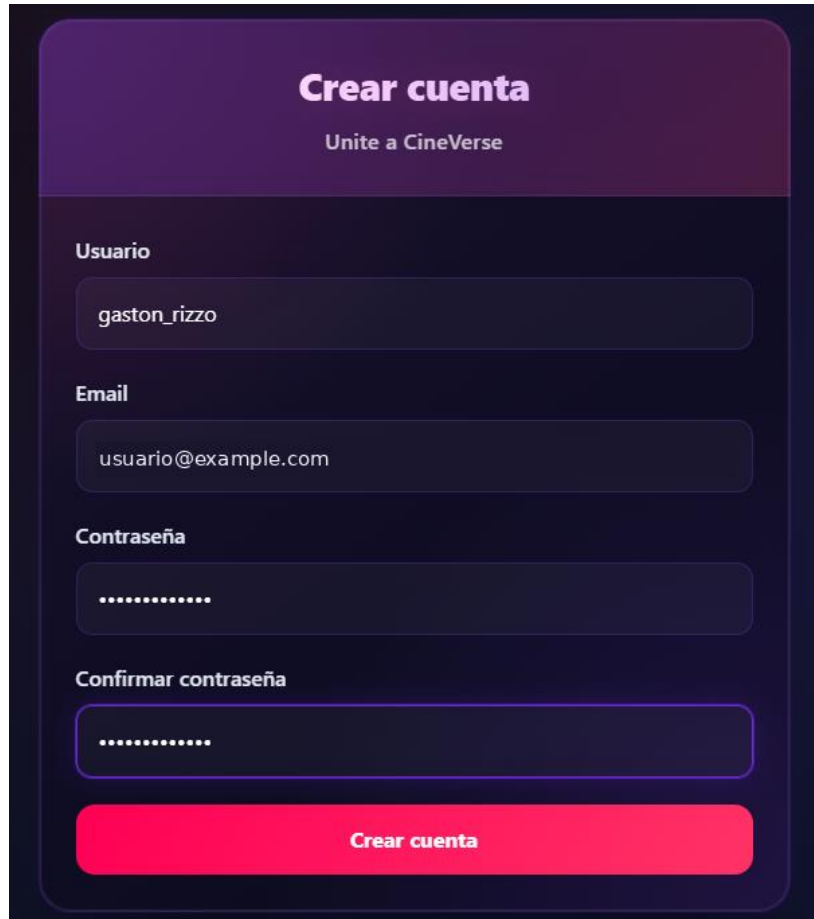

The screenshot shows the same password form, but the "Contraseña" field now contains seven dots. The requirements list is updated: "Mínimo: 8 caracteres" has a green checkmark, "Una mayúscula" has a bullet point, "Una minúscula" has a green checkmark, "Un número" has a bullet point, and "Un símbolo" has a green checkmark. The progress bar is partially filled with orange, and the word "Media" is shown in orange text.

The list changes as the user types.

The screenshot shows the password form with the "Contraseña" field containing eight dots. The requirements list is fully updated with green checkmarks for all items: "Mínimo: 8 caracteres", "Una mayúscula", "Una minúscula", "Un número", and "Un símbolo". The progress bar is completely filled with green, and the word "Fuerte" is shown in green text.

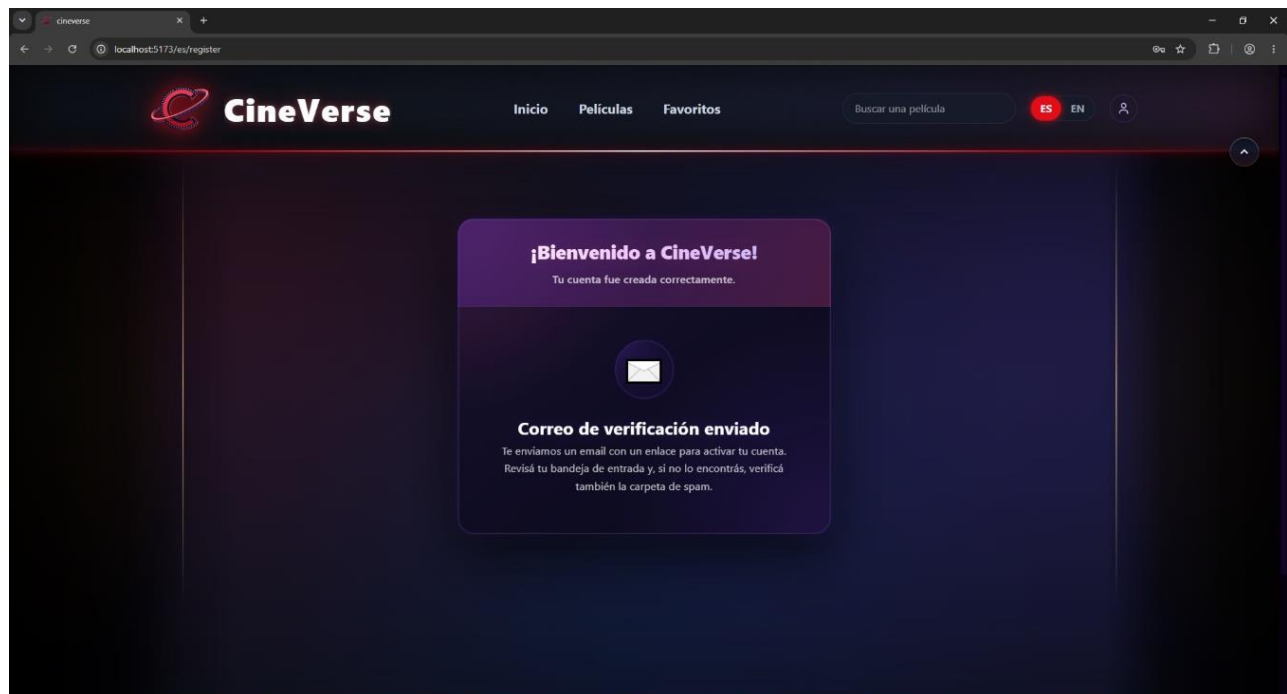

Password that meets the requirements.

21.3 Account Created

The registration form is titled "Crear cuenta" (Create account) with the subtitle "Únete a CineVerse". It contains four input fields: "Usuario" (Username) with the value "gaston_rizzo", "Email" with the value "usuario@example.com", "Contraseña" (Password) with masked characters ".....", and "Confirmar contraseña" (Confirm password) also with masked characters ".....". A red "Crear cuenta" button is at the bottom.

Completed form before creating the account.

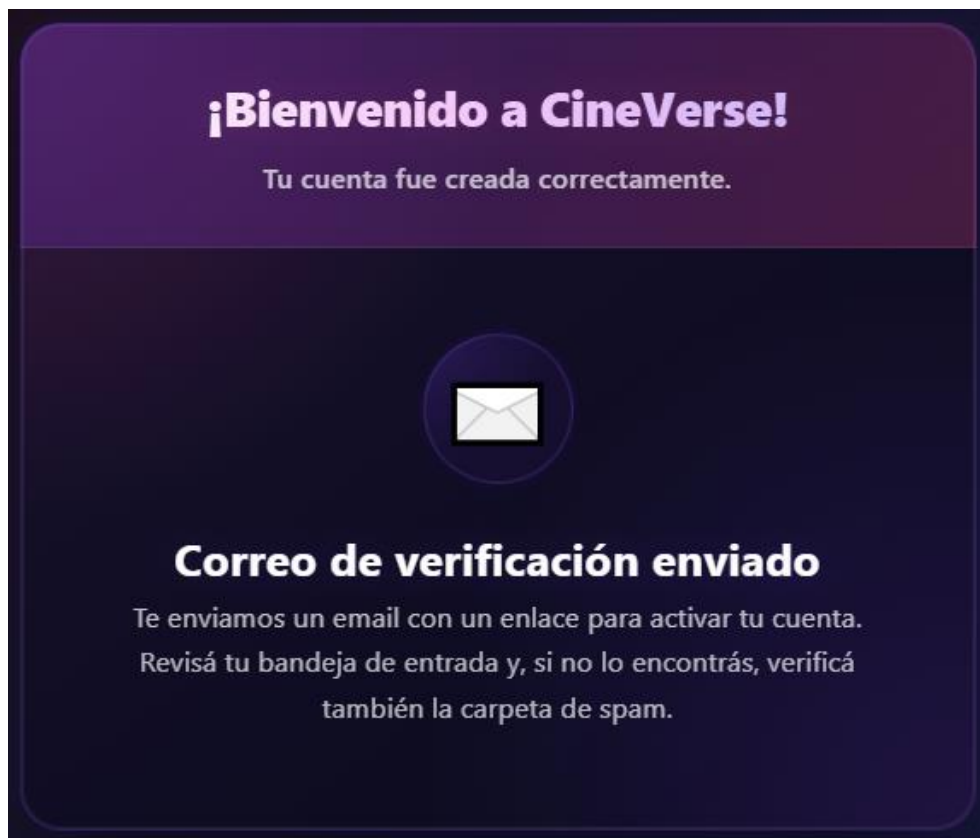

Confirmation that the account was created.

The account cannot yet be used to sign in until the email address has been verified.

22. Email Verification

After registration, CineVerse sends an email containing a verification link. The message language follows the language used during registration.

In these screenshots, email addresses and tokens have been replaced with sample values so the guide can be shared without exposing sensitive data.

Message confirming that the email was sent.
